

Trace Elements in Man and Animals 10

Edited by

A. M. Roussel

Joseph Fourier University, Grenoble, France

R. A. Anderson

Beltsville Human Nutrition Research Center, Beltsville, Maryland

and

A. E. Favrier

Joseph Fourier University, Grenoble, France

Kluwer Academic / Plenum Publishers
New York, Boston, Dordrecht, London, Moscow

CONTENTS

UNDERWOOD MEMORIAL LECTURE

1. Integrative Aspects of Zinc Metabolism and Function 1
Robert J. Cousins

I. CELLULAR AND MOLECULAR BIOLOGY OF TRACE ELEMENTS

Trace Elements Cellular Metabolims

2. The Copper Transporting ATPases in Human Disease 9
Jonathan D. Gitlin
3. Regulation and Function of the Copper Ion Transport Machinery 15
Jaekwon Lee and Dennis J. Thiele
4. Control of Gene Expression of Glutathione Peroxidase-1 and Other
Selenoproteins in Rats and Cultured Cells 21
Roger A. Sunde and Jacqueline K. Evenson
5. Cellular and Subcellular Distribution of Selenium and
Selenium-Containing Proteins in the Rat 29
Dietrich Behne, Henning Pfeifer, Doris Röthlein,
and Antonios Kyriakopoulos
6. The Mechanism and Regulation of Zinc Transport in Yeast 35
David J. Eide
7. Metallothionein Facilitates Zinc Absorption in Zinc Deficient Mice
but Limits Absorption in Zinc Replete Mice 43
P. Coyle, J. C. Philcox, and A. M. Rofe
8. Metallothionein and Innate Activation of Primary Human and
Mouse Monocytes 47
James Koropatnick, Suzanne Dale, and Rudolfs K. Zalups

9.	Role of Metallothionein on Zn, Cu, Cd Au, and Ag Accumulation in Hepatic Cytosol of Heavy Metal-Injected Rats	51
	S. Saito and K. Yoshida	
10.	Molecular Cloning of a Human cDNA Regulated by Heavy Metals	55
	M. G. Pagliuca, S. Cigliano, R. Lerose, and A. Leone	
11.	Distribution of Copper Transported ATP7B in Embryo and New Born Rat	59
	T. Hosokawa, M. Okabe, M. Kurasaki, A. Hata, F. Endo, K. Nagano, I. Matsuda, K. Urakami, and T. Saito	
12.	Interaction between Copper and Iron Metabolism in the Human Intestinal Caco-2 Cells	63
	I. Gabrielli, Y. Sambuy, S. Ferruzza, and M. L. Scarino	
13.	Induction of Metallothioneins by Zinc (Zn) Supplementation Quantification in Young Rat Tissues	65
	G. S. Henriques and S. M. F. Cozzolino	
Trace Elements and Oxidative Stress		
14.	Iron, Oxidative Stress, the <i>HFE</i> Gene, and Lung Cancer J. M. McCord, S. K. Bose, and B. Gao	67
15.	Selenium and the Protection against Peroxynitrite	71
	Helmut Sies, Lars-Oliver Klotz, Stefan M. Schieke, Karlis Briviba, and Gavin E. Arteel	
16.	Cooperative Effects of Zinc/Selenium and Thiols in the Protection	77
	against UV-Induced Genomic DNA Damage Marie-Jeanne Richard, Nathale Emonet-Piccardi, Christine Didier, Eric Jourdan, Marie-Thérèse Leccia, Marie-Odile Parat, Jean Cadet, Jean C. Béani, and Alain Favier	
17.	Trace Elements and Enzyme Redox Centers	83
	Marc Fontecave	
18.	Importance of Trace Elements in Transcription Factor NF- κ B Activation	89
	Jacques Piette	
19.	Trace Elements: Metabolism and Oxidative Modifications of Lipoproteins	97
	Y. Rayssiguier and A. Mazur	
20.	Co-localization of Cu/Zn-Superoxide Dismutase (SOD-1), Nitric Oxide Synthase (NOS), and Zn/Cu-Metallothionein (MT) in Rat Brain	105
	Masashi Okabe, Toshiyuki Hosokawa, Shigeru Saito, Takeshi Saito, Masaaki Kurasaki, and Hidesuke Shimizu	

21. Effect of Dolomite and Thiamine Supplementation on Serum Total Antioxidant Status and Bioelements Concentration in Lead-Intoxicated Rats 111
Z. Krejpcio and R. Wojciak
22. Protective Effects of Antioxidants on Iron-Induced Free Radical-Mediated Damaging Processes in Humans and Animals 115
Igor Afanas'ev, Elena Ostrachovich, Irina Deeva, and Ludmila Korkina
23. Complexes of Flavonoids with Iron and Copper as a New Way of Decreasing the Oxidative Damage Induced by Transition Metal Supplementation 119
L. G. Korkina, E. A. Ostrachovich, G. A. Ibragimova, and I. B. Afanas'ev
24. Oncogene Activation and Apoptosis as Possible Mechanism of Antitumour Effect of Ferric-Sorbitol-Citrate 123
Marija Poljak-Blazi, Marijeta Kralj, and Marijana Popovic-Hadzija
25. Changes in Oxidant and Antioxidant Status in Rats Fed Different Amounts of Selenium and Exposed to NO_x 127
J. Gromadzinska, W. Wasowicz, K. Rydzynski, and J. Neve
26. Zinc Protects Genomic DNA from Solar Light Injury: A Possible Role for Zinc-Induced Metallothionein? 129
E. Jourdan, N. Emonet-Piccardi, A. Favier, J. C. Beani, and M. J. Richard
27. The Effect of Carbamylation on Glutathione Peroxidase and Copper-Zinc Superoxide Dismutase 131
Heather E. Roxborough, Cheryl Reid, Jane McEneny, Caroline Mercer, Dorothy McMaster, Maireard O'Hare, and Ian S. Young
28. Anthracyclin Resistance of GLC4 Tumoral Cells and Intracellular Selenium Metabolism 133
M. Andriollo, P. Guiraud, M. J. Richard, and A. Favier
29. Antiproliferative Ability of Ferric-Sorbitol-Citrate and Ferrocenes for Malignant Cell Line, Hep2 and F10 135
M. Poljak-Blazi, A. Ferle Vidovic, V. Rapic, and D. Škare
30. Modulation of SP1 and NFκB Binding Activity by Aluminum in HeLa Cells 137
C. Garrel, M. Osman, and A. Favier

31.	Antioxidant Micronutrients Insulin-Sensitivity	138
	P. Faure, F. Couzy, D. Barclay, E. Rossini, M. J. Richard, J. Arnaud, A. Favier, and S. Halimi	
32.	Exacerbated Immune Stress Response in Early Magnesium Deficiency in the Rat.	139
	A. Mazur, C. Malpuech-Brugère, W. Nowacki, E. Rock, and Y. Rayssiguier	
33.	Zinc Protects Human Endothelial Vascular Cells against the Glucose Induced Cytotoxicity.	140
	K. Lalanne, S. Bouvard, N. Wiernsperger, P. Faure, A. Favier, and S. Halimi	
34.	Effects of Elevated Dietary Cu and Cd Concentrations on Oxidative Stress, Cell Proliferation, and Apoptosis in Atlantic Salmon (Salmon Salar L.) Parr	141
	Marc H. G. Berntssen, Sjoerd E. Wendelaar Bonga, and Amund Maage	
35.	Modulation of Copper Deficiency Induced Oxidative Stress by Dietary Polyphenol in the Rat	142
	I. Bureau, C. Feillet-Coudray, E. Gueux, E. Rock, A. Mazur, and Y. Rayssiguier	
36.	Thioredoxin/Thioredoxin Reductase System: Their Roles in DNA Stability and Cell Adaptation to Ultraviolet Radiation.	143
	C. Didier, M.-J. Richard, J. C. Beani, and A. Favier	
37.	Toxic Effect of Ciprofloxacin May be the Result of a Free Radical Pathway	144
	A. Gürbay, B. Gonthier, D. Daveloose, F. Hincal, and A. Favier	
Transport, Speciation and Distribution of Trace Elements		
38.	Trace Element Speciation in Human Body Fluids	145
	Peter Brätter, Andrea Raab, and Andrea N. Richarz	
39.	Gelfiltration and Anion-Exchange Chromatography for the Separation of Vanadium Binding Proteins in Plasma of Rats, Rabbits, and Humans	153
	K. De Cremer and K. R. Cornelis	
40.	Metabolism of Selenate Administered into Rats: Speciation of Selenium by HPLC-ICP MS.	157
	Kazuo T. Suzuki and Yamato Shiobara	

41. Fractionation of Soluble Selenium Compounds from Fish using Size-Exclusion Chromatography with On-Line Detection by Inductively Coupled Plasma Mass Spectrometry: Comparison with other Techniques 161
Gunilla Önning and Ingvar A. Bergdahl
42. Metabolism of Arsenic from Seaweed by Man and Animals: Speciation in Body Fluids using Liquid Chromatography Inductively Coupled Plasma Mass Spectrometry 165
Jörg Feldmann
43. Speciation of Selenium in Food and Animal Feed using Ion Chromatography On-Line Microwave Pretreatment Hydride Generation Atomic Absorption Spectrometry 169
Magnus Johansson, Guy Bordin, and Adela R. Rodriguez
44. Selenium True Absorption and Tissue Concentration of Rats at Dietary Selenite, Seleno Cysteine, and Seleno Methionine 173
W. Windisch and M. Kirchgeßner
45. Effects of Selenium Status on Selenium Incorporation into Plasma Fractions and Excretion in Urine in Men Infused with ^{74}Se Selenite 175
Y. Xia, J. Butler, M. Janghorbani, P. Ha, P. Whanger, J. Olesik, and L. Daniels
46. Magnesium Excretion and Redistribution in Rat Tissues after Disulfiram Experimental Administration 177
L. Kovatsi, M. Tsougas, H. Tsoukali, and D. Psaroulis
47. Selenium and Arsenic Distribution in Soluble Protein Fractions in Liver of Hens Fed with Added As_2O_3 178
V. Stibilj, I. Falnoga, D. Cestnik, and R. Jacimovic
48. Metal Distribution in Metallothioneins of Cytosols from Human Cirrhotic Livers 180
C. Wolf, P. Brätter, and U. Rösick
49. Effect of Retinol Deficiency on Liver Concentration of Fe, Cr, Zn, Mn, Co, Cd, and Pb in Rat 181
A. C. Anzulovich, L. B. Oliveros, L. D. Martínez, M. Roura, and M. S. Giménez
50. Vitamin A Deficiency Modify the Antioxidant Defenses and the Trace Elements Level in Rat Liver 183
A. C. Anzulovich, L. Oliveros, D. Martinez, M. Baucells, and M. S. Gimenez

51. Transport of Silver and Its Potential Interactions with Copper Metabolism in the Rat 184
S. Hanson, S. Donley, H. Rim, and M. C. Linder
52. Dietary Vanadium, P-ATPase-7a Expression and the Influence on Lysyl Oxidase and Cu Accumulation in Rat Skin and Liver 186
Robert B. Rucker, Chang Tai Cui, Eskouhie H. Tchapanian, Alyson E. Mitchell, Michael Clegg, Janet Y. Uriu-Hare, and Carl L. Keen

II. HUMAN PHYSIOLOGY AND STATUS OF TRACE ELEMENTS

Trace Elements in Food Chain, Diets and Intakes

53. Recommended Dietary Intakes for Trace Elements: New Trends 189
Janet C. King
54. Trace Element Addition to Foods: Technological and Nutritional Aspects 195
Denis Barclay
55. Trace Elements in Intravenous Nutrition 201
A. Shenkin
56. Trace Element Intake and Balance in Adults in Central Europe 209
M. Anke, M. Gleis, W. Dorn, R. Müller, J. Vormann, M. Müller, M. Jahritz, M. Seifert, S. Holzinger, S. Drobner, B. Röhrig, C. Rother, L. Angelow, and G. O. Latunde-Dada
57. Nutrient Risk Assessment: Implications for Food Fortification Policy ... 215
Mary R. L'Abbé, Kevin A. Cockell, Sheila Dubois, and William H. Ross
58. Vanadium—An Essential Element for Animals and Humans? 221
M. Anke, H. Illing-Günther, H. Gürtler, S. Holzinger, M. Jaritz, S. Anke, and U. Schäfer
59. Effect of Iron Fortification of Infant Weaning Foods on Mineral Absorption 227
C. Martínez, G. López, G. Ros, T. Fox, and S. J. Fairweather-Tait
60. An Approach to Assessing the Safety of Trace Element Supplementation. 228
D. H. Shrimpton
61. Strontium Transfer in the Food Chain of Humans 229
M. Anke, M. Seifert, M. Jaritz, E. Löscher, and E. Hartmann

62. Content of the Mineral Elements in the Light Diets Used for
Alimentation of the Pensioner House Residents in Warsaw 231
A. Klos and J. Bertrandt
63. Determination of Mineral Levels in Walnut Cultivars after Microwave
Mineralisation 232
F. Lavédrine, A. Ravel, A. Villet, V. Ducros, and J. Alary
64. Average Intake of Trace Elements in Military Food Services in
France 233
P. Le Francois and D. Argaud
65. Use of Haem Iron Concentrate in the Fortification of Weaning
Foods 235
C. Martínez, G. Ros, M. J. Periago, and G. López
66. Mineral Content in Four Spanish Fish after Bone Addition 237
Isabel Martínez, Mariá Jesús Periago, Marina Santaella y Gaspar Ros
67. Trace Elements in Austrian Food 239
A. Sima, M. Wilplinger, S. Zöchling, S. Heumann, U. Schaller,
and W. Pfannhauser
68. Trace Element (Cu, Fe, Zn) Intakes in Cuba 240
T. Verdura, J. Arnaud, P. Fleites, M. Chassagne, A. Favier, R.
Perez-Cristia, J. Barnouin, and the SECUBA group
69. Distribution of Trace Elements and Minerals in Pulp and Peel of Apples
and of Persimmons 242
Z. Zachwieja, J. Piotrowicz, M. Folta, H. Barton, S. Gorinstein,
M. Zemser, and S. Traktenberg
70. Mineral Elements in the Diet Planned for Consumption for Residents of
the Pensioner House in Warsaw 244
J. Bertrandt and A. Klos
71. Zinc is Scarce and Expensive 245
N. Darmon and A. Briend
72. Estimated Daily Intakes and Concentrations of Essential Trace Elements
in Infant Formulas 247
I. Navarro, J. I. Alvarez, and A. Martin
73. Clinical Evaluation of “Designer Eggs” as a Source of Essential
Micronutrients for Humans 248
P. Surai and A. MacPherson

74. Plasma Levels of Selenium, Selenoprotein P, and Glutathione Peroxidase and Their Correlations to Fish Intake and Serum Levels of Thyropropin and Thyroid Hormones—A Study on Latvian Fish Consumers 250
L. Hagmar, M. Persson-Moschos, B. Åkesson, and A. Schütz
75. Interlaboratory Comparison Studies into Determination of Metals Content in Foods, Organized by the National Institute of Hygiene 252
Krystyna Starska, Maria Wojciechowska-Mazurek, Elzbieta Brulinska-Ostrowska, and Kazimierz Karlowski
- Trace Elements Bioavailability**
76. Bioavailability of Trace Elements in Human Diet 255
Susan J. Fairweather-Tait
77. The Influence of Various Food Ingredients and Their Combinations on in Vitro Availability of Iron and Zinc in Cereal Based Vegetarian Meals. 261
V. V. Agte, K. V. Tarwadi, and S. A. Chiplonkar
78. Is Increasing Ascorbic Acid Intake from Foods an Effective Strategy for Improving Dietary Iron Bioavailability? An Evaluation Using Dietary Algorithms, Iron Isotopes, and a Food-Based Community Intervention Trial in Rural Mexico 267
Lindsay H. Allen, Olga Garcia Obregon, Margarita Diaz, Steven Abrams, Suzanne Murphy, and Jorge L. Rosado
- 78a. Iron Intake from Mixed Meals in Cameroon
A. Bell, F. Ndigui, and P. Effa 271
79. Bioavailability of Calcium and Zinc from Various Infant Formulae with and without Thickening Agents 275
Douwina Bosscher, Kristien Van Dyck, Harry Robberecht, Micheline Van Caillie-Bertrand, and Hendrik Deelstra
80. Absorption of Selenium from Biosynthetically Labelled Foods in Humans 279
C. Atherton, T. Fox, S. Fairweather-Tait, J. Dainty, J. Lewis, M. Baxter, H. Crews, and N. Langford
81. Tissue Zinc Uptake as a Measure of the Relative Bioavailability of Supplemental Zinc Sources for Domestic Animals 283
C. B. Ammerman, M. Sandoval, P. R. Henry, R. C. Littell, and R. D. Miles

82. Effects of Whole Wheat Flour and Fermentable Carbohydrates on Intestinal Absorption of Trace Elements in Rats 287
C. Coudray, H. W. Lopez, M. A. Levrat-Verny, J. Bellanger, C. Rémésy, and Y. Rayssiguier
83. Bioavailability of Different Sources of Protected Zinc 293
Daniel D. Gallaher, Cynthia M. Gallaher, Stephanie Shulman, Andrea McElhome, Kyle A. Brokken, and Gerry Shurson
84. Cobalt Deficiency Induced Hyperhomocysteinemia and Oxidative Status of Cattle 299
G. I. Stangl, F. J. Schwarz, and M. Kirchgessner
85. Role of Diet Related Habits and Cooking Practices on Bioavailability of Iron, Copper, and Zinc and Status of Iron in Vegetarians 305
V. V. Agte, M. Indumadhavi, V. Kakade, S. Palkar, S. Girigosavi, K. Tarwadi, and S. A. Chiplonkar
86. Dialysability of Calcium, Iron, and Zinc in Beans, Chick Peas, and Lentils 306
V. Sebastián, R. Barberá, R. Farré, and M. J. Lagarda
87. Effect of Zinc Depletion on Iron Transport across Isolated Duodenal Sacs 308
Peter W. F. Fischer and Bartholomeus Belonge
88. Mineral Element Status in Rats Fed Diets with Extruded or not Extruded Evening Primrose (*Oenothera Paradoxa*) 309
M. A. Gralak, H. Leontowicz, M. Leontowicz, A. Bogucka-Sciezynska, and G. W. Kulasek
89. Combined Effects of Complex Carbohydrates and a Resistant Protein on Intestinal Absorption and Status of Iron and Zinc in the Rat 311
D. Grizard, C. Coudray, M. Tahiri, J. C. Tressol, Y. Van Doesum, Y. Rayssiguier, and C. Barthelemy
90. Nutrient Risk Assessment: Implications for Food Fortification Policy 313
Mary R. L'Abbé, Kevin A. Cockell, Sheila Dubois, and William H. Ross
91. Design of Product as Source of Variance in "in Vitro" Mineral Availability of Homogenised Weaning Foods 314
A. B. Olivares, C. Martínez, and G. Ros
92. Iron Dialysability in Enteral Diets 315
C. H. Azevedo, A. P. Galhardo, and C. Colli

Contents	xix
103. Variability of Multiple Nutritional Elements in Hair of One Man Over Two Decades	339
L. M. Klevay, D. M. Christopherson, and T. R. Shuler	
104. Effect of Magnesium Deficiency on Enterocyte Ca, Fe, Cu, and Zn Content	340
E. Planells, N. Sanchez-Morito, P. Aranda, and J. Llopis	
105. Serum Copper, Zinc, and Selenium Levels with Regard to Psychological Stress in Men	341
A. Pizent, J. Jurasovic, M. Pavlovic, and S. Telišman	
106. Urinary Iodine and Thyroid Status of New Zealand Residents	343
C. D. Thomson, S. Woodruffe, A. Colls, and T. D. Doyle	
107. Serum Silicon Concentration of Healthy Persons in the Antwerp Region (Belgium)	345
K. Van Dyck, H. Robberecht, R. Van Cauwenbergh, and H. Deelstra	
Trace Elements in Pregnancy, Lactation, Growth	
108. Zinc and Human Pregnancy	347
Michael Hambidge, Nancy Krebs, and Laura Caulfield	
109. Trace Element Nutrition during Pregnancy and Lactation—Effect on Milk Trace Elements	353
Bo Lönnerdal	
110. Glutathione Peroxidase is Not a Functional Marker of Selenium Status in the Neonatal Period	359
L. A. Daniels, R. A. Gisbon, and K. Simmer	
111. Trace Element Transfer from the Mother to the Newborn—Investigations on Triplets of Colostrum, Maternal, and Umbilical Cord Sera	365
Michael Krachler, Erich Rossipal, and Dusanka Micetic-Turk	
112. Relationship between Trace Elements, Activities of Antioxidant Enzymes in Maternal and Umbilical Cord Blood in Poland	369
W. Wasowicz, J. Gromadzinska, K. Szram, K. Rydzynski, P. Wolkanin, Zb Pietrzak, and J. Tomczak	
113. Compensatory Changes in Selenoenzymes in Full Term Human Placentae Induced by Environmental Conditions	373
P. Zagrodzki, L. Zamorska, and M. Zadrozna	

114.	Maternal Anemia at Delivery, Outcome of Pregnancy and Infant Birth Weight, in a Group of Low Socioeconomic Level, in Greater Buenos Aires	375
	M. L. de Portela, L. López, S. H. Langini, S. Fleischman, A. Weisstaub, M. García, O. Moreno, and C. R. Ortega Soler	
115.	Trace Element and Vitamin Deficiencies in French Pregnant Women	377
	I. Hininger, M. Favier, H. Faure, J. Arnaud, F. Khatir, J. Thoulon, E. Hariveau, A. Favier, and A. M. Roussel	
116.	Vinegar Drink to Improve Iron Status during Pregnancy	379
	U. Heins, C. Koebnick, and C. Leitzmann	
117.	Evolution of Copper Contents from Colostrum to Transitional Human Milk	381
	M. D. Silvestre, M. J. Lagarda, R. Farré, C. Martinez-Costa, J. Brines, and G. Clemente	
118.	Ceruloplasmin Oxidase Expression in the Rowett Hooded Rat and Human Placenta during Pregnancy	383
	L. Gambling, W. Bruce-Johnson, R. G. Lea, M. J. Bingham, and H. J. McArdle	
119.	Anemia and Its Therapy with Peroral Antianemics in Pregnancy and Puerperium	385
	M. Mara, V. Eretova, J. Zivny, J. Kvasnicka, A. Umlaufova, and E. Marova	
120.	Requirements for the Essential Trace Elements Iron and Zinc during Pregnancy	387
	Shahla M. Wunderlich	
121.	Urinary Selenium in Preterm Infants: Effect of Inorganic Versus Organic Selenium Intake	388
	L. A. Daniels, R. A. Gibson, and K. Simmer	
122.	Trace Element Balance Study in Very Low Birthweight Infants	390
	Andrea Raab, Andrea Loui, Peter Brätter, and Michael Obladen	
123.	Nutritional Status of Iron of Pre-School Children from the City of Juiz de Fora, MG, Brazil	391
	E. L. Chicourel, A. F. Pinto, Ae. C. Lassance, M. Fisberg, and S. M. F. Cozzolino	
Trace Elements in Exercise and Extreme Conditions		
124.	Exercise Effects on Trace Element Metabolism	393
	Richard A. Anderson	

125.	Altitude Related Changes in Red Blood Cell Membrane Lipids and Proteins. Possible Links with Redox	399
	Claus Behn, Manuel Ivan Estrada, Eliseo Hibert Dávila, Oscar Araneda, Max González, Alejandro Carrasco, Rudy Soria, Mauricio Araos, Mercedes Villena, Wilma Téllez, Hilde Spielvogel, Enrique Vargas, Jorge Cajigal, Gloria Celedan, and Gustavo Gonzolez	
126.	Effect of Supplementation with Brazil Nuts (CP, <i>Bertholletia excelsa</i> H. B. R.), in Capoeira Players on Selenium (Se) Concentration and Glutathione Peroxidase's Activity (GSH-Px, E.C.1.11.1.9)	405
	V. F. Coutinho, V. B. Bittencourt, and S. M. F. Cozzolino	
127.	Effects of Weight Loss and Weight-Bearing Exercise on Blood and Organ Concentrations of Lead and Some Essential Metals	407
	Francis W. Kemp, Shenggao Han, Wenjie Li, David Tiber, Chenzang Wang, David Sepulveda, Justin Holmes, and John D. Bogden	
Trace Elements in Aging		
128.	Trace Element Deficiencies and Supplementations in the Elderly	409
	Anne-Marie Roussel	
129.	Serum and Urine Selenium Changes in a Group of Elderly during One Year of Selenium Supplementation	417
	J. Kvícala, V. Zamrazil, and J. Jiránek	
130.	Blood and Skin Antioxidant Status in Werner Syndrome (4 patients)	421
	M. T. Leccia, M. J. Richard, G. Borla Darve, J. C. Béani, A. Favier, and P. Amblard	
131.	Effects of Aluminum on Glutamate Metabolism: A Possible Explanation for Its Toxicity in the Aged Rats and in an Experimental Model of Aluminum Overload	425
	Cécile Struys-Ponsar, Olivier Guillard, and Phillippe van den Bosch de Aguilar	
132.	Zinc-Induced Excessive Glutamate Release May Cause Accelerated Senescence with Defect in Learning and Memory in Senescence Accelerated Mouse	429
	Takeshi Saito, Noriko Nakagawa, Kyoko Takahashi, Dan Li, Yuwako Yamamoto, Hiroko Sasaki, Nozomu Nakamura, Kazuhiro Ogawa, Hiroyoshi Fujita, Masaaki Kurasaki, Masaski Okabe, and Toshiyuki Hosokawa	
133.	Serum Selenium and Glutathione Peroxidase Activity in Octogenarian and Nonagenarian Subjects in Belfast	433
	I. M. Rea, D. McMaster, A. Murphy, and C. Mercer	

134. Long Term Tropical Antioxidant Treatment Provides Protection against Clinical Signs of Photoaging 437
L. Vaillant, L. Declercq, D. Malvy, J. C. Béani, J. Bazex, D. Maes, and S. Hercberg
135. Lactulose Stimulates Calcium Absorption in Postmenopausal Women Dose-Dependently 441
E. G. H. M. van den Heuvel, Th. Muijs, W. van Dokkum, and G. Schaafsma
136. Selenium and Cognitive Decline in the Elderly—The EVA Study 442
C. Berr, B. Balansard, J. Arnaud, A. M. Roussel, and A. Alépovitch
137. Does Hormonal Replacement Therapy Influence Antioxidant Status and LDL Oxidizability in Post-Menopausal Women? 443
I. Bureau, F. Laporte, V. Ducros, H. Faure, Y. Rayssiguier, A. Favier, and A. M. Roussel
138. Metallothionein Expression and Its Significance in the Brain Aging of Dog 444
Akinori Shimada, Masahiko Satoh, and Chiharu Tohyama
139. Vitamin and Mineral Intakes and Biochemical Status in a Spanish Aged Women Group. Effects of Body Mass Index 446
P. Valera, P. Garcia-Garcia, R. M. Ortega, A. Lopez-Sobaler, and A. M. Requejo
140. Biomarkers of Mouse Aging: Modifications of Minerals and Antioxidant Enzymes 448
Heng-Kuan Wong, Jacqueline Riondel, and Alain Favier
141. Does Hormonal Replacement Therapy Influence Trace Element Status in Post-Menopausal Women? 449
I. Bureau, J. Arnaud, R. Anderson, M. J. Richard, F. Laporte, A. Favier, and A. M. Roussel
142. Relationship between Serum Selenium and Red Cell and Plasma Glutathion Peroxidase Levels: Effect of Supplementation with Nutritional Doses of Antioxidants in Elderly and Adult Subjects 450
Paul Preziosi, Josiane Arnaud, Marie-Jeanne Richard, Pilar Galan, Denis Malvy, Serge Briancon, Anne-Marie Roussel, Alain Favier, and Serge Hercberg

Epidemiology of Trace Elements

143. Intervention Studies on Antioxidant Trace Elements. Special Focus on Selenium 453
Serge Hercberg

|------|--|-----|
| 144. | Selenium Status in Northern Ireland and France: The Prime Study | 463 |
| | Dorothy McMaster, Pedro Marques-Vidal, Pierre Ducimetière,
Phillipe Amouyel, Dominique Arveiler, Alun Evans | |
| 145. | Determinants of Blood Selenium Concentrations in France (SU VI
MAX Study) | 467 |
| | J. Arnaud, A. M. Roussel, P. Preziosi, P. Galan, S. Hercberg, A. Favier,
and the SU VI MAX group | |
| 146. | Selenium Status and Antioxidant Enzyme Activities in High School
Children from an Endemic Goiter Area | 469 |
| | B. Giray, T. Teziç, Y. Gedik, A. Öktem, and F. Hincal | |
| 147. | Iodine Content of Water and Selenium Level in Corn and Wheat
Consumed in an Endemic Goiter Area | 471 |
| | B. Giray and F. Hincal | |
| 148. | Selenium Deficiency in South-West Bohemia | 473 |
| | J. Kvícala, V. Zamrazil, and V. Jiránek | |
| 149. | Effect of Copper Supplementation in Middle Aged People on Plasma
Anti-Oxidants and Red Blood Cell Oxidizability: Foodcue
Study | 475 |
| | E. Rock, A. Mazur, Y. Rayssiguier, C. Kehoe, J. M. O'Connor,
M. P. Bonham, and J. J. Strain | |
| 150. | Plasma and Urine Selenium of Cows from Various Regions of the
Czech Republic and Its Comparison with Corresponding Human
Population Selenium Indexes | 477 |
| | J. Kvicala and V. Kroupová | |
| 151. | A Comparative Study of Blood Antioxidant Parameters in Two
Portuguese Urban Populations | 479 |
| | A. M. Viegas-Crespo, M. C. Santos, M. L. Pavão, P. A. Lopes,
and J. Nève | |
| 152. | Comparison of Trace Elements and Macronutrients in Breast Milk of
Women from Eight Different Geographical Locations | 481 |
| | G. M. Radzanowski, J. Jackson, K. Pramuk, and S. M. Kaup | |
| 153. | Selenium Concentration in Human Milk and the Daily Se Intake by
Breast-Fed Infants in the Western Part of Poland | 482 |
| | B. A. Zachara and A. Pilecki | |
| 154. | Effect on Biochemical Markers of Two-Years Supplementation with
Antioxidants in the SU.VI.MAX Study: Interest of Nutritional
Doses | 484 |
| | Serge Hercberg, Henri Faure, Paul Preziosi, Josiane Arnaud,
Marie-Jeanne Richard, Pilar Galan, Denis Malvy,
Serge Briancon, Anne-Marie Roussel, and Alain Favier | |

155. Iodine Nutrition of French Adults Issued from the SU.VI.MAX Cohort 486
Pierre Valeix, Marjorie Zarebska, Paul Preziosi, Bruno Pelletier, and Pilar Galan
156. Dietary Iron Intake and Iron Status of French Adults Participating in the SU.VI.MAX Cohort 488
Pilar Galan, Paul Preziosi, Bernadette Fieux, Marjorie Zarebska, Serge Briancon, Denis Malvy, Anne-Marie Roussel, Alain Favier and Serge Hercberg

III. Trace Elements in Human Diseases

Diabetes

157. Insulin Enhancing Effects of Vanadium 491
John H. McNeill
158. Is Zinc Essential to Modulate Insulin Sensitivity? 497
Patrice Faure, Serge Halimi, Sophie Bouvard, Olivier Ramon, Karine Lalane, Anne Marie Roussel, and Alain Emile Favier
159. Role of Chromium in Glucose Intolerance, Diabetes, Total Parenteral Nutrition, and Body Composition 503
Richard A. Anderson, William Cefalu, Khursheed N. Jeejeebhoy, and Gilbert R. Kaats
160. Evaluation of Zinc in Children with Type 1 Diabetes Mellitus 511
L. P. C. Pedrosa, A. Spínola-Castro, M. Matsumoto, J. Len, F. Schwartzman, L. P. Camargo, and S. M. F. Cozzolino
161. Zinc Sulphate Induced Metallothionein in Pancreatic Islets of Mice and Protected from Streptozotocin-Induced Diabetes 515
Patricia Ohly, Claudia Dohle, Josef Abel, and Helga Gleichmann
162. Water Content of Minerals Associated with Type 2 Diabetes Mellitus of Samples Collected on the Navajo Reservation 519
Judith Hallfrisch, Claude Veillon, Kristine Patterson, A. David Hill, Irene Benn, Bessie Holiday, Ruby Ross, Sylvia Zhonnie, Frances Price, and Ann Sorenson
163. Dietary Copper Deficiency Causes Elevation of Early and Advanced Glycation End-Products 523
J. T. Saari and G. M. Dahlen
164. The Use of Stable Isotope Tracers to Explore Zinc and Selenium Metabolism in Insulin Dependent Patients 527
M. Bertouze, P. Faure, V. Ducros, S. Halimi, and A. Favier

165.	Zinc Modulates the Glucose Induced Rat Aortic Smooth Cell Proliferation	528
	S. Bouvard, P. Faure, A. Favier, M. Leconte, and S. Halimi	
166.	Metabolic Effects of Dietary Chromium-L-Methionine in Horses and Beef Cattle	530
	M. T. Socha, S. L. Ralston, R. Raub, E. B. Kegley, C. K. Swenson, A. B. Johnson, and T. M. Fakler	
167.	Zinc Protects HeLa Cells against the Glucose Induced Cytotoxic Effect	532
	P. Faure, S. Bouvard, A. Favier, and S. Halimi	
168.	Oxidative Stress and Antioxidant Trace Element Status in Patients with Non Insulin-Dependent Diabetes	534
	A. Kerkeni, A. M. Roussel, A. Othmane, S. Majhoub, N. Zouari, F. Najjar, J. Arnaud, A. Favier, and R. A. Anderson	
169.	Zinc Deficiency Increases the Deleterious Effect of High Fructose Diet on Fetal Development and Free Radical Activity in Rats	536
	B. Lachil, P. Faure, C. Ribuot, J. Arnaud, M. J. Richard, M. Sève, and A. Favier	
170.	Zinc 100 ppm Does Not Improve Insulin Sensitivity of High Fructose Fed Rats Leading to Insulin Resistance	538
	E. Rossini, S. Bouvard, M. J. Richard, S. Halimi, and A. Favier	
171.	Design of New Oxovanadium (IV) Complexes for Treatment of Diabetes. Bioavailability, Speciation, and Tissue Targeting Considerations	539
	K. H. Thompson, J. H. McNeill, and C. Orvig	
172.	The Metallic Component of the Glucose Tolerance Factor, G. T. F.: Cobalt against Chromium	540
	F. Silió, A. Santos, and B. Ribas	

Cardiovascular Diseases and Oxidative Stress

173.	The Interaction between Dietary Copper and Excess Iron—Increases the Risk of Heart Disease	543
	Meira Fields and Charles G. Lewis	
174.	Selenium and Chronic Heart Failure	547
	Michel de Lorgeril, Patricia Salen, and Michèle Accominotti	
175.	Antioxidant Status of Patients with Unstable Angina Pectoris and Acute Myocardial Infarction	551
	Momcilo B. Mihailovic, Zorana Vasiljevic, Sladjana Sobajic, Ivan B. Jovanovic, Olivera Pesut, and Gordana Matic	

176.	The Effect of Zinc Deficiency on Parameters of Lipoprotein Metabolism and Lipolysis in Rats Fed Different Fats	555
	K. Eder, S. Wild, and M. Kirchgessner	
177.	Plasma Level of Antioxidant Minerals (Cu, Zn, Mn, and Se) and Fe: A Comparison of Patients with Cerebro-vascular Disease and Healthy Adults in Korea	559
	I. S. Kwun, H. S. Jang, and C. S. Kwon	
178.	Trace Elements as Determined by ICP-MS Analysis in Patients with Coronary Artery Disease	563
	Ellen Burgess, Robert Audette, Merrill Knudtson, and George Wyse	
179.	The Effect of Zinc Deficiency on Some Key Enzymes of Lipid Metabolism in Rats Fed Olive Oil or Linseed Oil	565
	K. Eder, K. Waldhauser, and M. Kirchgessner	
180.	Lipid Concentrations of Low-Density Lipoproteins and Their Oxidative Susceptibility in Zinc-Deficient Rats	566
	K. Eder and M. Kirchgessner	
181.	Comparative Evaluation of Trace Elements Contents in Aortic Wall and in Hair Samples of Young Males	568
	A. V. Skalny, A. A. Zhavoronkov, A. L. Chernyaev, and A. V. Koudrine	
182.	Heart Disease Risk in the UK as Influenced by Environmental Factors and Defined by Hair Calcium Concentration	569
	A. MacPherson and J. Bacsó	
183.	Regulation of Hepatic Cholesterol and Lipoprotein Metabolism in Copper-Deficient Rats	571
	A. Mazur, C. Sérougne, C. Moundras, B. Bayle, F. Millat, and Y. Rayssiguier	
184.	Copper Body Status and Cardiovascular Diseases	573
	G. Mielcarz	
185.	Increased Plasma Glutathione Peroxidase Activity in Patients with Acute Myocardial Infarction	574
	B. A. Zachara, M. Ukleja-Adamowicz, J. Lecka, and E. Nartowicz	
Other Human Diseases		
186.	Selenium in Cancer Prevention	575
	M. P. Rayman and L. C. Clark	
187.	Trace Elements in Hypertension	581
	Gianfranco Vivoli, Margherita Bergomi, Paola Borella, and Sergio Rovesti	

188. Persistence of Goiter Despite Oral Iodine Supplementation in Goitrous Children with Iron-Deficiency Anemia in the Côte d'Ivoire 587
Michael Zimmermann, Pierre Adou, Toni Torresani, Christophe Zeder, and Richard Hurrell
189. Trace Elements in Patients Treated by On-Line Hemodiafiltration. The Blood Chromium Behaviour 591
A. Baj, G. Bregante, R. D'Angelo, G. Bonforte, F. Toffoletto, and M. Surian
190. Relationships between Trace Element Nutriture and Progression of Human Immunodeficiency Virus Infection 597
John D. Bogden, Joan H. Skurnick, Francis W. Kemp, Shenggao Han, Joan Lloyd, Herman Baker, and Donald B. Louria
191. Iron and Manganese Homeostasis in Chronic Liver Disease: Relationship to Pallidal T1-Weighted Magnetic Resonance Signal Hyperintensity 601
Elise A. Malecki, Attila G. Devenyi, Todd F. Barron, Timothy J. Mosher, Paul Eslinger, Claire V. Flaherty-Craig, and Lorenzo Rossaro
192. Effect of Depression and of Antidepressant Therapy on Serum Zinc Levels—A Preliminary Clinical Study 607
Malgorzata Schlegel-Zawadzka, Andrzej Zieba, Dominika Dudek, Mirosław Krosniak, Maria Szymaczek, and Gabriel Nowak
193. Abnormalities of Iron Homeostasis in the Pregnancy Syndrome Pre-Eclampsia 611
M. P. Rayman, J. Barlis, S. Sokari, R. W. Evans, C. W. G. Redman, and L. J. King
194. Lipid Peroxidation in Patients with Diseases Known to Affect Trace Element Status 617
Mariana Vlad, P. J. Porr, G. Uza, and Maria Zirbo
195. Selenium Status of Breast and Gastrointestinal Cancer Patients in Turkey 623
B. Avsar and I. G. Gökmen
196. Zinc and Selenium Intake in Nondialysed Patients with Chronic Renal Failure 625
D. Mafra, D. I. T. Favaro, and S. M. F. Cozzolino
197. Zinc Nutritional Status in Patients with Chronic Renal Failure, Residents in São Paulo, Brazil 626
D. Mafra, L. Cuppari, and S. M. F. Cozzolino

198.	Iron, Zinc, Copper Levels of Thalassemia Patients of Northern Cyprus	627
	R. Oktekin and G. Gökmen	
199.	Blood Markers of Oxidative Stress in Patients with Amyotrophic Lateral Sclerosis	629
	D. Bonnefont-Rousselot, M. C. Jaudon, L. Lacomblez, B. Bourelly, V. Doppler, C. Bizard, F. Salachas, G. Bensimon, J. Delattre, and V. Meininger	
200.	Glutathione Peroxidase Activity Is Reduced in Haemodialysis Patients	631
	H. E. Roxborough, C. M. Loughrey, C. Mercer, D. McMaster, and I. S. Young	
201.	Copper and Zinc Levels in Patients with Colorectal Polyps	633
	K. Linke, G. Mielcarz, and K. Zietek	
202.	Total Superoxide Dismutase Activity and Glutathione Peroxidase Activity in Plasma of Phenylketonuric Subjects Supplemented with Selenium	634
	M. Calomme, P. Cos, V. Ramaekers, B. François, M. Van Caillie-Bertrand, and D. Vanden Berghe	
203.	The Content of Selected Bioelements in Hair of Children with Infantile Cerebral Palsy (Paralysis Cerebralis Infantilis, Diplegia)	636
	R. W. Wójciak and Z. Krejpcio	
204.	Serum Copper in Juvenile Rheumatoid Arthritis	638
	O. M. S. Amancio, D. M. A. Chaud, and M. O. E. Hilário	
205.	Serum Copper in Juvenile Rheumatoid Arthritis: Influence of Dietary Copper	639
	D. M. A. Chaud, O. M. S. Amancio, and Hilário M. O. E.	
206.	Gallium Nitrate and Zinc Content in Peripheral Blood Lymphocytes of Patients with Lung Cancer	640
	A. V. Koudrine and A. V. Skalny	
207.	Antioxidant Systems in Normal and Preeclamptic Algerian Pregnant Women	641
	Brahim Lachili, Josiane Arnaud, Henri Faure, Marie Jeanne Richard, Anwar Bouabssa, Anne Marie Roussel, and Alain Favier	
208.	Effect of Erythropoietin Therapy and Selenium Supplementation on Some Antioxidant Parameters in Blood of Uremic Patients on Long-Term Hemodialysis	643
	B. A. Zachara, A. Adamowicz, U. Trafikowska, A. Pilecki, A. Trafikowska, E. Nartowicz, and J. Manitius	

Trace Element Toxicity and Environmental Exposure

209. Arsenic Groundwater Contamination and Sufferings of People in West Bengal-India and Bangladesh 645
 U. K. Chowdhury, B. K. Biswas, T. Roy Chowdhury, B. K. Mandal, G. Samanta, G. K. Basu, C. R. Chanda, D. Lodh, K. C. Saha, D. Chakraborti, S. C. Mukherjee, S. Roy, S. Kabir, and Q. Quamruzzaman
210. Heavy Metals and Persistent Organic Pollutants in Newborn Correlated with Maternal Smoking 651
 Bente Deutch and Jens C. Hansen
211. Copper and Early Childhood Cirrhosis (ECC)—A Retrospective Study in Germany 655
 H. H. Dieter, W. Schimmelpfennig, E. Meyer, and M. Tabert
212. Difference in Penetration of Metals into the Brain 663
 Takeshi Minami, Yuko Sakita, Yuko Okazaki, and Ryouhei Amano
213. Exposure to Platinum-Group Metals Released by Automotive Catalytic Converters: The Case of Urban Youngsters 667
 S. Caroli, F. Petrucci, B. Bocca, M. Krachler, F. Forastiere, and A. Alimonti
214. Urinary Copper and Mortality among Inhabitants Living in a Cadmium Polluted Area in Japan 671
 M. Nishijo, H. Nakagawa, Y. Morikawa, M. Tabata, K. Miura, K. Higashiguchi, T. Seto, T. Kido, K. Nogawa, K. Mizukoshi, and M. Nishi
215. Serum Selenium in Relation to Biomarkers of Lead in Men 675
 J. Jurasovic, A. Pizent, and S. Telišman
216. Hepatotoxic Effects Associated to Short and Long Term Exposure to Excess Dietary Copper in Rats 679
 E. Aburto, A. Cribb, and C. Fuentealba
217. The Biological and Medical Importance of the Interactions between Nickel and Zinc, Magnesium and Manganese in Vivo 685
 M. Anke, A. Trüpschuch, and G. Gunstheimer
218. Effect of Aluminum on Manganese Superoxide Dismutase (MnSOD) Expression 687
 C. Garrel, C. Carron, and A. Favier
219. Indicators for Sensitisation to Ni, Co, and Cr, a Eu-Project 688
 Olof Vesterberg

220. Fish Consumption and Mercury Speciation in Hair of Indigenous Population of the Amazon 690
Antonio C. Barbosa, José G. Dórea, Jurandir R. Souza, and Glauce L. Oliveira
221. Metabolism of Phospholipids in Pituitary Gland: Effect of Ion Cadmium 691
Ana María Calderoni and María Sofía Giménez
222. Investigations on the Elements Status Markers in Humans. Lead Significant Correlation between Pb Content in Milk Teeth and Blood of 6-Year-Old Children 693
H. Barton, Z. Zachwieja, and M. Folta
223. Morphologic and Biochemical Assessment of the Role of Lipid Peroxidation in the Pathogenesis of Copper Toxicity in Copper-Loaded Rats 695
E. Aburto, A. Cribb, and I. C. Fuentealba
224. Effect of Dolomite and Thiamine Supplementation on Tissue Trace Elements Concentrations in Lead-Intoxicated Rats 697
Z. Krejpcio, D. Olejnik, R. W. Wojciak, and J. Gawêcki
225. Acute Human Molybdenum Toxicity from a Dietary Molybdenum Supplement—A New Member of the “Lucor Metallicum” Family 699
Berislav Momcilovic
226. Effects of Lead on the Maturation of the Female Gamete and Fertility 701
B. Lefèvre, J. Poupon, A. Pesty, V. Machelon, and J. Testart
227. Rhamnogalacturonan II (RG-II), a Prectic Polysaccharide Present in the Vegetable-Derived Products, Strongly Decreases Lead Tissue Accumulation: Potential Interest in Chronic Lead Exposure 703
M. Tahiri, P. Pellerin, J. C. Tressol, T. Doco, Y. Rayssiguier, and C. Coudray
228. Dietary Exposures to the Platinum Group Elements 705
G. E. Ysart, P. F. Miller, H. Crews, P. Robb, M. Baxter, C. De L'argy, S. Lofthouse, C. Sargent, and N. Harrison
229. Acute and Chronic Effects of Acid Phenol Compounds on Aluminum Retention in Rats 707
Z. Deng, L. Gouzoux, C. Coudray, A. Mazur, Y. Rayssiguier, and D. Pépin

230. Determination of Total and Soluble Titanium in Soft Tissues Covering Titanium Microplates in Stomatology: An Analytical Study 709
 J. Poupon, J. P. Méningaud, C. Chenevier, M. Galliot-Guilley, and J. Ch. Bertrand

IV. TRACE ELEMENTS IN ANIMALS

231. Tissue Selenium Levels in Laying Hens Are Influenced by Dietary Oils and Fatty Acids Including Trans Fatty Acids 711
 Klaus Schäfer

232. Dietary Mo as an Antagonist to Cu Absorption: Stable Isotope (⁶⁵Cu) Measurements in Grazing Sheep 717
 S. O. Knowles, N. D. Grace, J. R. Rounce, A. Litherland, D. M. West, and J. Lee

233. Copper-Associated Cirrhosis in North Ronaldsay Sheep: A Possible Model for Idiopathic Copper Toxicosis 723
 S. Haywood, T. Müller, W. Müller, and Z. Dincer

234. Dietary Copper Affects Lipid and Cholesterol Metabolism in Finishing Steers 729
 T. E. Engle, J. W. Spears, C. L. Wright, and T. A. Armstrong

235. A Comparison of Two Methods of Copper Supplementation for Grazing Red Deer (*Cervus Elaphus*) 733
 D. V. Illingworth, D. W. Jackson, N. R. Kendall, and S. B. Telfer

236. Trace Elements and Vitamins in Blood of Alpacas (*Lama pacos*) and Sheep Grazing the Same Pasture 737
 G. J. Judson, B. A. McGregor, and A. M. Howse

237. A Comparison of the Efficacy of Proprietary Products in the Treatment of Molybdenum Induced Copper Deficiency 741
 N. R. Kendall, C. Middlemas, H. Maxwell, F. Birch, D. V. Illingworth, D. W. Jackson, and S. B. Telfer

238. The Effect of a Copper, Cobalt, and Selenium Bolus on Sheep from Three Upland Scottish Farms 749
 A. M. Mackenzie, N. R. Kendall, D. V. Illingworth, D. W. Jackson, I. M. Gill, and S. B. Telfer

239. Selenium and Fluoride Toxicology—Water Quality Guidelines for Dohne Merino Sheep in Southern Africa 753
 J. A. Meyer and N. H. Casey

240. Effect of Dietary Copper Level and High Sulfate Water on Copper Metabolism and Growth in Cattle 759
 C. L. Wright, J. W. Spears, T. E. Engle, and T. A. Armstrong

241.	Apparent Trace Element Absorption in Growing Pigs Fed Rations of Increasing Calcium Carbonate Content	763
	Torben Larsen, José A. Fernández, and Ricarda M. Engberg	
242.	Heat Processing of Protein Sources on the Faecal Excretion of Their Selenium in Dairy Cows	767
	J. B. J. van Ryssen and G. E. Schroeder	
243.	Dietary Antagonists to Copper Absorption: Stable Isotope Measurements in Grazing Ruminants	768
	J. Lee, N. D. Grace, J. R. Rounce, and S. O. Knowles	
244.	The Effect of a Zinc, Cobalt, and Selenium Bolus on Ram Semen Quality and Trace Element Status	769
	N. R. Kendall, A. Green, S. McMullen, and R. G. Rodway	
245.	The Effect of Lead on the Rate of Fermentation of Herbage by Rumen Micro-Organisms	772
	S. T. Strojjan and C. J. C. Phillips	
246.	Effects of Intraruminal Monensin and Selenium Capsules on Glutathion Peroxidase, Calcaemia, Phosphatemia, and Live Weight Gain in Heifers on Pasture with <i>Solanum Malacoxylon</i>	775
	Bruna E. Ruksan, Laura Marangunich, and L. Barry Lowe	
247.	Trace Element Content in Natural and Commercial Cat's Food and Trace Element Status of Cats Depending on Sex and Disease	777
	S. Anke, H. Gürtler, and M. Anke	
248.	Validation and Normal Ranges of Plasma Ceruloplasmin Concentration in Cats and Dogs	779
	C. J. Charlton, S. L. Wattam, and N. D. Skinner	
249.	Current AAFCO and NRC Recommendations for Selenium Are Too Low for Puppies	781
	K. J. Wedekind, J. DeBraekeleer, and G. F. Combs	
250.	The Effect of a Zinc, Cobalt, and Selenium Bolus on Sheep from Nine Upland Scottish Farms	782
	N. R. Kendall, A. M. Mackenzie, D. V. Illingworth, D. W. Jackson, I. M. Gill, and S. B. Telfer	
251.	Field Trials of A Copper, Cobalt, and Selenium Soluble Glass Bolus	784
	N. R. Kendall, A. M. Mackenzie, and S. B. Telfer	
252.	Evaluation of the Trace Mineral Status of Lactating Dairy Cattle in Trans NZOIA District Western Kenya	786
	F. D. O. Oduor, I. O. Jumba, and S. O. Wandiga	

253. Canine Ferritin: Assay Validation and Normal Range for Serum 787
 N. D. Skinner, C. J. Charlton, and S. L. Ebbrell

V. INDIVIDUAL TRACE ELEMENTS

Iron

254. Iron in Infancy: Absorption, Erythrocyte Incorporation, Loss 789
 Robert E. Serfass

255. Transport of Iron in Health and Diseases 795
 Andreas Rolfs and Matthias A. Hediger

256. Benefits and Problems Associated with Iron Supplementation and
 Fortification 799
 Serge Herberg

257. Low Iron Diet and Cadmium Exposure Disrupt Steroidogenesis
 in the Rat 809
 Martina Piasek, John W. Laskey, Krista Kostial, Maja Blanuša,
 and Janet M. Ferrell

258. Peculiarities of Nonheme Iron Metabolism upon Experimental
 Modelling of Rat Glial Brain Tumour. Perspectives for Diagnosis
 and Treatment 813
 Olga M. Mykhaylyk, Natalie A. Dudchenko, Eugene A. Lebedev,
 and Bogdan S. Shurunov

259. Iron Bioavailability from Iron Amino Acid Chelate or Ferrous Sulfate
 for Treatment of Iron Deficiency Anemia 819
 Oscar Pineda, H. DeWayne Ashmead, and Alain Bourdonnais

260. The Effect of a High Intake of Whole Wheat Bread Produced with and
 without Phytase on Iron Status in Young Women 820
 M. Hansen, B. A. Jorgensen, and S. Sandström

261. Zinc Status in Pregnancy Assessed by Hair Analysis—Nutritional
 Influences 821
 U. Heins, C. Koebnick, and C. Leitzmann

262. In Vitro Properties of Ferrous and Ferric Ions with Phytate 823
 D. Oberleas

263. Iron Metabolism in Rats Consuming Olive Oil or Sunflower Oil Unused
 or Used in Repeated Potato Frying 825
 A. M. Pérez-Granados, M. P. Vaquero, and M. P. Navarro

264. The Ferritin Secreted by Cultured Hepatoma Cells in Response to Iron and Inflammatory Cytokines Strongly Resembles the Ferritin in Serum and Has Homology to Intracellular Ferritins as Well as Immunoglobulins 827
L. Butcher, M. Hazegh-Azam, A. Nguyen, P. Nguyen, K. Vu,
L. Rezaee, C. Juska, K. Schaffer, M. Zamany, L. Estevez, M. Hallock,
and M. C. Linder
265. Two Levels of Iron Supplementation and Developmental Outcome, Iron Nutrition, and Adverse Results in Low Birth Weight Infants 829
J. K. Friel, P. F. Kwa, B. Simmons, K. Aziz, C. Mercer,
A. MacDonald, and W. L. Andrews
- Selenium**
266. Some Functions of the Essential Trace Element, Selenium 831
Thressa C. Stadtman
267. Characteristics and Function of Selenoprotein P 837
Raymond F. Burk and Kristina E. Hill
268. Some Biochemical Functions of Selenium in Animals and Man 843
J. R. Arthur and G. J. Beckett
269. The Secis Element in Selenoprotein mRNAs. A Rosetta Stone for Decoding the UGA Selenocysteine Codon and a Molecular Tag for Unveiling New Selenoproteins 849
Alain Lescure, Daniel Gautheret, Robert Walczak, Philippe Carbon,
and Alain Krol
270. Prolonged Stimulation of Rats with Adrenocorticotrophic Hormone (ACTH) Alters Concentration of Selenium in the Kidney: Reversibility and Possible Mechanism 855
B. Cheng, T. S. Srikumar, F. M. Al-Awadi, J. Thakkar,
and F. Sequeira
271. Dietary Selenium Intake and Antioxidant Defenses in Tissues of Peripuberal Rats 859
Maria Cristina Santos, Jean Nève, Maria Leonor Pavão,
and Ana Maria Viegas-Crespo
272. Selenoprotein P in Plasma in Relation to Cancer Morbidity in Middle-Aged Swedish Men 865
Marie Persson-Moschos, Lars Stavenow, Björn Åkesson,
and Folke Lindgärde
273. Effect of Selenium Supplementation on Plasma Selenoprotein P of New Zealanders 869
Christine D. Thomson, Anna J. Duffield, and Kristina E. Hill

274. Tracking the Metabolism and Excretion of Selenium in Real Time in Humans 873
G. Bellisola, M. Colombatti, G. Fracasso, F. Pasti, M. Valdes,
and A. Torboli
275. Changes in Indices of Selenium Status in Men on Low, Medium, and High Intakes 877
T. Fox, C. Atherton, S. Fairweather-Tait, J. Dainty, J. Lewis,
M. Baxter, and H. Crews
276. True Absorption, Excretion, and Tissue Retention of Selenium at Widely Varying Selenium Supply to Rats 883
W. Windisch and M. Kirchgessner
277. The Oral Intake of Antioxidant Nutrient Associated with Selenium Does Protect Skin against Actinic Exposure 887
Jean Pierre Césarini and S. Demanneville
278. Bioavailability of Selenium from Untreated and Processed Selenomethionine-Enriched Fillets of Atlantic Salmon (*Salmosalar*) 891
R. Oernsrud and M. Lorentzen
279. Stability of Glutathione Peroxidase Activity during Storage and Heat Treatment of Whey 892
H. Lindmark Månsson, J. Chen, and B. Åkesson
280. Purification and Enzyme-Linked Immunoassay of Bovine Extracellular Glutathione Peroxidase 893
H. Lindmark Månsson and B. Åkesson
281. Selenium Distribution in Liver of Hens Fed with Sunflower Oil 895
I. Falnoga, V. Stibilj, D. Mazej, and M. Tušek Znidaric
282. Selenium and Lipoproteins: Preliminary *in Vivo* and *in Vitro* Observations in Humans 897
V. Ducros, F. Laporte, N. Belin, A. David, A.-M. Roussel,
and A. Favier
283. Transforming Growth Factor- β_1 Inhibits Selenoprotein P Expression in Cultured Human Liver Cells 899
V. Mostert, I. Dreher, J. Köhrle, and J. Abel
284. Experimentally Induced Selenium and Vitamin E Deficiency in Growing Rabbits 901
J. Pallauf, A. Müller, and Erika Most

285. Identification of 5 Novel Selenoproteins Based on RNA Structural Tags 903
A. Lescure, D. Gautheret, P. Carbon, and A. Krol
286. Tat Protein of HIV1 Decreases Selenogluthathione Peroxidase and Increases Uv-A Cytotoxicity Independently of Selenium Supplementation 904
M. J. Richard, P. Guiraud, and A. Favier
287. Serum Selenium Concentrations and the Acute Phase Response 906
T. M. T. Sheehan and Aleha Khatun

Copper

288. Neurochemical Alterations following Perinatal Copper Deficiency in Rodents 909
Joseph R. Prohaska
289. Molecular Analysis of Wilson Disease Gene in French Patients 917
I. Ceballos-Picot, A. Nicole, B. Aral, C. Franvel, C. Soulié, H. Lassal, F. Woimant, M. Haguenau, and P. Chappuis
290. Defining Optimal Copper Status in Humans: Concepts and Problems 923
J. J. Strain
291. Dietary Copper, Vanadate, Lysyl Oxidase Activity, and Lysine Tyrosyl Quinone Formation 929
Robert B. Rucker, Changtai Cui, Eskouhie H. Tchapanian, Alyson E. Mitchell, Michael Clegg, Janet Y. Uriu-Hare, Brian Rucker, Tracy Stites, and Carl L. Keen
292. Copper Metabolism in the Rodent Kidneys 933
Masaaki Kurasaki, Masashi Okabe, Mika Suzuki-Kurasaki, Shigeru Saito, Toshiyuki Hosokawa, Osamu Yamanoshita, and Takeshi Saito
293. Effect of Copper in the Food Chain on Human Health (FOODCUE: Fair Ct95-0813) 937
E. Rock, J. J. Strain, J. M. O'Connor, M. P. Bonham, Y. Rayssiguier, A. Mazur, B. Sandström, S. Hodjberg-Bugel, S. J. Fairweather-Tait, I. J. Harvey, G. Majsak-Newman, A. Flynn, K. Cashman, A. Baker, F. Ginty, J. H. Beattie, I. Bremner, M. D. Reid, G. Rotilio, M.-L. Scarino, Y. Sambuy, S. Ferruzza, M. R. Ciriolo, and A. DeMartino

294. The Effect of Copper Supplementation on Putative Indices of Body Copper Status and on Oxidative and Inflammatory Measures (FOODCUE Project) 943
 J. M. O'Connor, M. P. Bonham, E. Turley, C. Kehoe, J. S. Coulter, M. S. Faughnan, A. McKeown, V. J. McKelvey-Martin, E. Rock, Y. Rayssiguier, A. Mazur, A. Flynn, K. Cashman, A. Baker, and J. J. Strain
295. Role of Ceruloplasmin in Fe Efflux from Placenta; Identification of an Endogenous Cu Oxidase in Human Placental Cells (BeWo) 947
 Ruth Danzeisen and Harry J. McArdle
296. Dietary Molybdenum: Effect on Copper Absorption, Excretion, and Status in Young Men 951
 Judith R. Turnlund and William R. Keyes
297. Identity and Regulation of the Copper Transport Protein, Transcuprein 955
 N. Liu, L. Lo, T. Tran, L. Jones, and M. C. Linder
298. Response of Diamine Oxidase and Other Copper Status Biomarkers to Modifications in Dietary Copper in the Rat 957
 C. Feillet-Coudray, A. Mazur, C. Coudray, E. Rock, and Y. Rayssiguier
299. Effect of Dietary Copper Intake on Biochemical Indices Associated with Copper Metabolism 959
 L. Harvey, G. Majsak-Newman, S. Fairweather-Tait, A. Baker, K. Cashman, and A. Flynn

Zinc

300. Metallothioneins: Their Cellular Function and Relationship with Zinc 961
 John H. Beattie and Ian Bremner
301. Zinc as a Cellular Regulator of Apoptosis 969
 Alain Favier
302. Zinc and Growth 977
 Michael Hambidge and Nancy Krebs
303. Zinc Nutriture as Related to Brain 981
 Harold H. Sandstead, Christopher J. Frederickson, and James G. Penland
304. Zinc in Preterm and Term Infants—Parallel Studies on Metabolic Balances and Plasma Concentrations 987
 E. Sievers, U. Schleyerbach, T. Arpe, D. Garbe-Schönberg, and J. Schaub

305. Activity of Calmodulin-Regulated Enzymes in Tissues of Zinc-Deficient Rats 991
H.-P. Roth, S. Schmidmayer, and M. Kirchgessner
306. Zinquin Ester—A Reagent for the Investigation of the Role of Available Zn(II) in Living Systems 995
David Ward, Stephen Lincoln, Henry Betts, Peter Zalewski, Ian Forbes, Indumathy Mahadevan, Marc Kimber, and Kym Hendrickson
307. Cognitive Effects of Adaptation to a Low Zinc Diet in Healthy Men 999
M. J. Kretsch, A. K. H. Fong, J. G. Penland, B. Sutherland, and J. C. King
308. Intracellular Zinc Chelation Induces Apoptosis, Caspases Activation, and Transcription Factors Degradation in Jurkat and HeLa Cells 1003
Sève Michel, Chimienti Fabrice, Richard Sandrine, Mathieu Jacques, and Favier Alain
309. Effect of Zinc Supplementation on Biological Parameters of Bone Turnover in Healthy Men 1009
Anne Peretz, Pierre Bergmann, Théodore Papadopoulos, Vania Siderova, and Jean Néve
310. Betaine-Homocysteine S-Methyltransferase is an Abundant Zinc Metalloenzyme in Liver 1013
Andrew P. Breska III and Timothy A. Garrow
311. Nourishment: To Moderate Constantly or to Indulge Occasionally—The Message of Zinc Dose-Rate Idiorrhythm to the Needy 1017
Berislav Momcilovic
312. Concentration of Growth Hormone, IGF-1, Insulin and C-Peptide in Rat Serum during Development of Alimentary Zinc Deficiency 1021
H.-P. Roth and M. Kirchgessner
313. Moderately High Zinc Intake Impairs Verbal Memory of Healthy Postmenopausal Women on a Low Copper Diet 1025
James G. Penland, David B. Milne, and Cindy W. Davis
314. Identification of the Zinc Binding Protein in a Child with Hyperzincaemia as Calprotectin (MRP8/MRP14) 1031
B. Sampson, P. Richmond, B. E. Golden, M. K. Fagerhol, J. H. Beattie, and I. Z. Kovar
315. Characterisation of the Different Steps during Zinc Chelation Induced Apoptosis in Jurkat and HeLa Cells 1035
F. Chimienti, M. Sève, S. Richard, J. Mathieu, and A. Favier

316. Effect of Ion Zinc on the Metabolism of Phosphatidylcholine and Sphingomyelin in Lung of Rat 1036
 N. N. Gomez, M. R. Fernandez, M. S. Ojeda, and M. S. Gimenez

317. Metallothionein, Calmodulin, and Trace Elements in Healing Skin Wounds 1038
 B. Sampson, A. Lansdown, and A. Rowe

318. Zinc Modulation of Macrophages Interleukin 1 Gene Expression and Secretion 1039
 A. E. Aguilar, R. Pastelin, S. Pérez, and M. D. Lastra

319. Assessment of Zn Role in Murine Experimental Cysticercosis Caused by *Taenia crassiceps* 1040
 M. D. Lastra, E. Scitutto, R. Pastelin, A. E. Aguilar, and G. Frago

Boron

320. The Dogged Path to Acceptance of Boron as a Nutritionally Important Mineral Element 1043
 Forrest H. Nielsen

321. Homing in on the Molecular Basis of Boron Essentiality Using Differential Display, Gene Arrays, and Northern Blots 1049
 C. D. Eckhert, A. Bennett, K. Becker, and D. Luo

322. Estimation of Dietary Boron Intake in Six Countries: Egypt, Germany, Great Britain, Kenya, Mexico, and the United States 1053
 Charlene Rainey, Leslie Nyquist, Jennifer Casterline, and Dena Herman

323. Nutritional Essentiality of Boron for Development, Maturation, and Reproduction in Frogs—A Review 1057
 D. J. Fort, R. L. Rogers, E. L. Stover, P. L. Strong, and F. J. Murray

324. Effects of Boron in Wound Healing: Experiments on Nude Mice 1061
 Brigitte Dousset, Mohamed Benderdour, Ketsia Hess, Rosine Mayap-Nzietchueng, Francine Belleville, and André Duprez

325. Effect of Dietary Boron on Bone Characteristics and Plasma Parameters in Young Pigs 1067
 T. A. Armstrong, J. W. Spears, T. E. Engle, and C. L. Wright

326. Dietary Boron Is a Physiological Regulator of the Normal Inflammatory Response 1071
 Curtiss D. Hunt

327. Boron Stimulated Yeast Differential Gene Expression 1077
A. Bennett, V. Gilman, N. Soch, D. Luo, and C. D. Eckhert
328. Identification by Gene Arrays of Boron Responsive Genes in Yeast 1078
K. Becker, A. Bennett, and C. D. Eckhert
329. Limb Teratogenesis Induced by Chronic Boron or Copper Deficiency in
Xenopus 1079
D. J. Fort, E. L. Stover, F. J. Murray, and P. L. Strong
330. An Assessment of Fertility in Boron-Exposed Turkish Subpopulations:
An Epidemiological Approach 1080
M. Çöl, B. S. Sayli, Y. Genç, E. Erçevik, A. H. Elhan, and A. Keklik
331. Photoreceptor Dystrophy in Boron Depleted Zebrafish 1082
S. Dohs and C. D. Eckhert
332. Adverse in Vitro Development of Preimplantation Mouse Embryos
Exposed to Low Boron Diet and Low Boron 1083
L. Lanoue, F. J. Murray, P. L. Strong, and C. L. Keen
333. The Temporal Effects of Low Dietary Boron (B) on Tissue B
Concentrations in Rats 1085
J. Y. Uriu-Adams, B. J. Horwath, F. J. Murray, G. Downing, P. Strong,
and C. L. Keen
334. Boron Stimulates Yeast Growth 1087
A. Bennett, N. Soch, R. Rowe, and C. D. Eckhert
335. Does Boron Act on Transcription and Translation of Proteins? 1088
M. Dzondo-Gadet, R. Mayap Nzietchueng, K. Hess, P. Nabet,
F. Belleville, and B. Dousset

VI. TRACE ELEMENT ANALYSIS

336. New Sensitive Methods in the Determination of Trace Elements 1091
P. Schramel
337. Distribution of Selenium, Arsenic, Iron, and Scandium in Selenium-
Deficient Rats Using the Multitracer Technique 1099
Rieko Hirunuma, Shuichi Enomoto, Shizuko Ambe,
and Fumitoshi Ambe
338. Separation of Metallothionein Isoforms and Identification of
Complexed Metals by Capillary Zone Electrophoresis Using
Diode Array Detection 1103
V. Virtanen, G. Bordin, and A.-R. Rodriguez

339.	Inductively Coupled Plasma Time of Flight Mass Spectrometry for Trace Element—and Speciation Analysis	1107
	Håkan Emteborg, Xiaodan Tian, Monika Heisterkamp, and Freddy C. Adams	
340.	Silicon Absorption from Stabilized Orthosilicic Acid and Other Supplements in Healthy Subjects	1111
	M. Calomme, P. Cos, P. D’Haese, R. Vingerhoets, L. Lamberts, M. De Broe, C. Van Hoorebeke, and D. Vanden Berghe	
341.	Preparation and ICP-MS Measurements of Magnesium Stable Isotopes in Human Samples	1115
	M. Sabatier, W. R. Keyes, M. J. Arnaud, and J. R. Turnlund	
342.	Characterization of Zinc Metallothioneins Using Electroanalytical Methods	1116
	M. Dabrio and A. R. Rodríguez	
343.	Hepatic Metallothionein Isoforms Induction by Cadmium and Its Detection Using Capillary Electrophoresis	1117
	B. Ribas Ozonas, O. García Arribas, and M. Pérez Calvo	
344.	Recent Developments in HPLC-ICP-MS for the “Difficult” Elements	1119
	F. Abou-Shakra and P. Booker	
345.	Determination of Heavy Metals in Calcium and Herbal Supplements Utilizing Inductively Coupled Plasma Mass Spectrometry (ICP-MS)	1120
	Elzbieta (Ela) Bakowska	
346.	Overview of Biomedical Applications of Inductively Coupled Plasma Mass Spectrometry (ICP-MS)	1121
	Elzbieta (Ela) Bakowska	
347.	Determination of Serum Cobalt at the Nanomolar Level by Direct Electrothermal Atomic Absorption Spectrometry	1122
	J. Poupon, V. Gleizes, G. Saillant, and M. Galliot-Guilley	
	List of Participants	1125
	Author Index	1149
	Subject Index	1157
