

Trace Element Metabolism in Animals-2

Edited by

W. G. Hoekstra, Ph.D., The University of Wisconsin

J. W. Suttie, Ph.D., The University of Wisconsin

H. E. Ganther, Ph.D., The University of Wisconsin

Walter Mertz, M.D., United States Department of Agriculture

University Park Press
Baltimore

Contents

Preface	xv
Registered Participants	xvii
Additional Participants	xxv
Introductory Lecture Trace-Element Research: Recent Developments and Outlook <i>W. Mertz</i>	1
The Entatic Properties of Cobalt Carboxypeptidase and Cobalt Procarboxypeptidase <i>B. L. Vallee</i>	5
Involvement of Copper and the Cupreins in the Biochemistry of Oxygen <i>U. Weser</i>	19
Biochemical Functions of Zinc with Emphasis on Nucleic Acid Metabolism and Cell Division <i>J. K. Chesters</i>	39
Biochemical Role of Manganese <i>R. M. Leach, Jr.</i>	51
Biochemical Role of Selenium <i>W. G. Hoekstra</i>	61
Trace Element Interactions: Effects of Dietary Composition on the Development of Imbalance and Toxicity <i>C. F. Mills</i>	79
Chemical Parameters in Trace-Element Antagonisms <i>G. Matrone</i>	91
The Biochemical Evolution of the Iron and Copper Proteins <i>E. Frieden</i>	105
Interaction of Selenium with Mercury, Cadmium, and Other Toxic Metals <i>J. Pařízek, J. Kalousková, A. Babický, J. Beneš and L. Pavlík</i>	119

Iron Metabolism as a Function of Chelation <i>J. P. Christopher, J. C. Hegenauer and P. D. Saltman</i>	133
A Possible Role for Trace Amounts of Selenium and Vitamin E in the Electron-Transfer System of Rat-Liver Microsomes <i>A. T. Diplock</i>	147
Adaptive Changes of the Milk Xanthine Oxidase and Its Isoenzymes during Molybdenum and Copper Action <i>V. V. Kovalsky, I. E. Vorotnitskaya and G. G. Tsoi</i>	161
Zinc Deficiency in Children <i>K. M. Hambidge</i>	171
Chromium as a Dietary Essential for Man <i>W. Mertz</i>	185
Iron Absorption, A Mediated Transport Across the Mucosal Epithelium <i>W. Forth</i>	199
The Impact of Infectious Disease on Trace-Element Metabolism of the Host <i>W. R. Beisel, R. S. Pekarek and R. W. Wannemacher, Jr.</i>	217
Roles of Temperature and Trace-Metal Metabolism in Host-Pathogen Interactions <i>E. D. Weinberg</i>	241
Tracing and Treating Mineral Disorders in Cattle Under Field Conditions <i>J. Hartmans</i>	261
The Selenium-Deficiency Problem in Animal Agriculture <i>D. E. Ullrey</i>	275
Zones of Display of Biological and Pharmacotoxicological Action of Trace Elements <i>A. I. Venchikov</i>	295
The Effect of Cadmium and Lead on Copper and Zinc Metabolism <i>H. G. Petering</i>	311
Effects of Fluoride on the Metabolism of Cultured Cells <i>J. W. Suttie, M. P. Drescher, D. O. Quissell and K. L. Young</i>	327
Mechanisms for the Conversion of Selenite to Selenides in Mammalian Tissues <i>H. E. Ganther and H. S. Hsieh</i>	339
New Essential Trace Elements (Sn, V, F, Si): Progress Report and Outlook <i>K. Schwarz</i>	355
Essentiality and Function of Nickel <i>F. H. Nielsen</i>	381
Essentiality and Function of Vanadium <i>L. L. Hopkins, Jr.</i>	397

Essentiality and Function of Silicon <i>E. M. Carlisle</i>	407
Essentiality and Function of Fluoride <i>H. H. Messer, W. D. Armstrong and L. Singer</i>	425
SHORT COMMUNICATIONS	
Rapid Multi-element Analysis of Biological Samples Using an Energy-Dispersive X-ray Fluorescence Method <i>N. F. Mangelson, G. E. Allison, J. J. Christensen, D. J. Eatough, M. W. Hill, R. M. Izatt and K. K. Nielson</i>	439
Reverse-Extraction Technique for the Determination of Fluoride in Biological Materials <i>P. Venkateswarlu</i>	442
Seasonal Variations in Hair Mineral Levels of the Alaskan Moose <i>A. Flynn and A. W. Franzmann</i>	444
Ingested Soil as a Source of Elements to Grazing Animals <i>W. B. Healy</i>	448
Biogeochemical and Soil Ingestion Studies in Relation to the Trace- Element Nutrition of Livestock <i>I. Thornton</i>	451
Mineral Composition of Tropical Grasses <i>H. Kayongo-Male, J. W. Thomas, and D. E. Ullrey</i>	455
Accumulation of Toxic Heavy Metals by Plants in Missouri's Lead Belt <i>D. D. Hemphill</i>	458
The Strontium Concentration in Developing Mandibles and Teeth and in Enamel of Non-erupted and Erupted Teeth of Human Beings <i>I. Gedalia, S. Yariv, H. Nayot, and E. Eidelman</i>	461
Multi-media Indices of Environmental Trace-Metal Exposure in Humans <i>C. Pinkerton, J. P. Creason, D. I. Hammer and A. V. Colucci</i>	465
Excretion of Cadmium and Lead into Milk <i>G. P. Lynch, D. G. Cornell and D. F. Smith</i>	470
Normal and Pathological Excretion of Trace Elements by Urine in Man <i>J. Ma Culebras-Poza, M. Dean-Guelbenzu, M. Santiago-Corchado and A. Santos-Ruiz</i>	473
Activation of Serotonine and 5-Hydroxyindolacetic Acid in Brain Structures after Application of Cadmium <i>B. Ribas-Ozonas, M. C. Ochoa Estomba and A. Santos-Ruiz</i>	476
Hepatic Cuproproteins in Copper-loaded Rats <i>L. C. Bloomer and T. L. Sourkes</i>	479

The Half-cystine-rich Copper Protein of Newborn Liver. Probable Relationship to Metallothionein and Subcellular Localization in Non-mitochondrial Particles Possibly Representing Heavy Lysosomes <i>H. Porter and J. R. Hills</i>	482
Superoxide Dismutases: Properties, Distribution, and Functions <i>E. M. Gregory and I. Fridovich</i>	486
Copper and Zinc Proteins in Ruminant Liver <i>I. Bremner</i>	489
Zinc Proteins in Rat Liver <i>I. Bremner and N. T. Davies</i>	493
Albumin as a Possible Site for Copper-Zinc Interaction <i>G. W. Evans and C. Hahn</i>	497
Cadmium Accumulation in Rat Liver: Correlation between Bound Metal and Pathology <i>D. Winge, J. Krasno, and A. V. Colucci</i>	500
Influence of Cadmium on the Synthesis of Liver and Kidney Cadmium-binding Protein <i>R. J. Cousins</i>	503
On the Chemistry and Bioavailability to the Rat of the Iron in Wheat <i>E. R. Morris, F. E. Greene, and A. C. Marsh</i>	506
Zinc-Metalloenzyme Activities in Response to Depletion and Repletion of Zinc <i>P. Roth and M. Kirchgessner</i>	509
Trace-Element Content and Enzymatic Activities in Tissue of Zinc-deficient Pigs <i>R. E. Burch, R. V. Williams, H. Hahn, R. V. Nayak and J. F. Sullivan</i> ..	513
Reproduction and Prenatal Development in Relation to Dietary Zinc Level <i>L. S. Hurley and G. Cosens</i>	516
Intestinal Absorption of Copper, Zinc, and Iron After Dietary Depletion <i>F. J. Schwarz and M. Kirchgessner</i>	519
On the Metabolic Availability of Absorbed Copper and Iron <i>E. Grassmann and M. Kirchgessner</i>	523
Zinc, Iron and Chelate Interaction in Poults and Chicks <i>F. H. Kratzer</i>	527
Effect of Parenterally Administered EDTA on Endogenous Secretion and Metabolism of Zinc in the Rat <i>H.-J. Lantzsch and K. H. Menke</i>	530

Zinc Status in Depletion and Repletion and Its Relation to Vitamins and Trace Elements <i>J. Pallauf and M. Kirchgessner</i>	534
Zinc in the Rat Paneth Cell <i>M. E. Elmes</i>	538
Intestinal Absorption and Secretion of ^{65}Zn in the Rat <i>A. H. Methfessel and H. Spencer</i>	541
Turnover of ^{65}Zn in Domestic Fowl <i>C. Garcia del Amo, R. MA Zunzunegui and A. Santos-Ruiz</i>	544
The Effect of Micro-organisms upon Zinc-65 Retention Using Germfree Rats <i>J. C. Smith, Jr., E. G. McDaniel and L. D. McBean</i>	547
Adaptations in Zinc Metabolism by Lactating Cows Fed a Low-zinc Practical-type Diet <i>W. J. Miller, M. W. Neathery, R. P. Gentry, D. M. Blackmon, and P. E. Stake</i>	550
Interactions among Dietary Copper, Zinc, and the Metabolism of Cholesterol and Phospholipids <i>L. M. Klevay</i>	553
Manganese Metabolism and Homeostasis in Calves and Rats <i>J. W. Lassiter, W. J. Miller, M. W. Neathery, R. P. Gentry, E. Abrams, J. C. Carter, Jr. and P. E. Stake</i>	557
Compartmental Analysis of $^{63}\text{Ni(II)}$ Metabolism in Rodents <i>C. Onkelinx, J. Becker, and F. W. Sunderman, Jr.</i>	560
The Binding of Selenium to Serum Albumin <i>J. L. Herrman and K. P. McConnell</i>	564
Effect of Selenicals on the Primary Immune Response in Mice <i>J. E. Spallholz, J. L. Martin, M. L. Gerlach, and R. H. Heinzerling</i>	567
Selenium-binding Proteins of Ovine Tissues <i>P. D. Whanger, N. D. Pedersen and P. H. Weswig</i>	571
Fate of [^{75}Se -]selenomethionine in the Gastrointestinal Tract of Sheep <i>M. Hidioglou and K. J. Jenkins</i>	574
Some Effects of Small Changes of Selenium Intake by Sheep <i>H. J. Lee</i>	578
Selenium Metabolism in Pigs <i>J. Leibetseder, A. Kment, and M. Skalicky</i>	581
The Relationship between the Selenium-catalyzed Swelling of Rat-Liver Mitochondria Induced by Glutathione (GSH) and the Selenium-catalyzed Reduction of Cytochrome <i>c</i> by GSH <i>O. A. Levander, V. C. Morris, and D. J. Higgs</i>	584
Growth and Reproduction with Rats Fed Selenite-Se <i>A. W. Halverson</i>	587

Changes in Eating and Drinking Behavior of Rats Caused by Selenium
T. R. Shearer590

Antioxidants and Cancer. III. Selenium and Other Antioxidants Decrease Carcinogen-Induced Chromosome Breakage
R. J. Shamberger593

Factors Influencing Iron Utilization by the Baby Pig
J. P. Hitchcock, P. K. Ku, and E. R. Miller598

The Effects of Iron and Copper Supplementation of the Diet of Sows during Pregnancy and Lactation on the Iron and Copper Status of Their Piglets
R. G. Hemingway, N. A. Brown, and J. Luscombe601

An Association between Copper Concentration in Blood and Hemoglobin Type in Sheep
G. Wiener, J. G. Hall, and S. Hayter605

Comparative Responses of Hypocupremic Ewes to Oral and Intravenous Cu and Their Use in Assessing the Availability of Dietary Cu
N. F. Suttle608

Effects of Molybdenum and Sulphur at Concentrations Commonly Found in Ruminant Diets on the Availability of Copper to Sheep
N. F. Suttle612

Action of Cyanides and Thiocyanates on Copper Metabolism in Sheep
A. G. Spais, A. C. Agiannidis, N. G. Yantzis, A. A. Papasteriadis and T. C. Lazaridis615

Induced Copper Deficiency in Beef Cattle; The Effects of Early and Late Supplementation on Copper Status and Animal Production throughout Life
D. B. R. Poole, P. A. M. Rogers, and D. D. MacCarthy618

Effects of High Molybdenum Intake on Protein Components and Histochemical Properties of Wool
R. Kawashima and N. Ishida621

Effects of Long-Term Maintenance of Sheep on a Low-Cobalt Diet as Assessed by Clinical Condition and Biochemical Parameters
A. MacPherson and F. E. Moon624

Zinc Deficiency in Cattle Under Greek Conditions
A. G. Spais and A. A. Papasteriadis628

Changes in Circulating Copper, Manganese, and Zinc with the Onset of Lay in the Pullet
R. Hill632

Some Characteristics of Trace Element Metabolism in Poultry
B. Panić, L. J. Bezbradica, N. Nedeljkov, and A. G. Istwani635

The Role of the Abomasum in Recycling of Iodine in the Bovine <i>J. K. Miller, E. W. Swanson, G. E. Spalding, W. A. Lyke, and R. F. Hall</i>	638
The Influence of Iron, Copper, Zinc and EDTA on Fowl Typhoid in Chicks <i>R. M. Hill and I. M. Smith</i>	641
Excretion of Trace Elements in Bile <i>W. H. Strain, W. L. Macon, W. J. Pories, C. Perim, F. D. Adams, and O. A. Hill, Jr.</i>	644
On the Role of Adrenocorticosteroids in the Control of Zinc and Copper Metabolism <i>R. I. Henkin</i>	647
Growth-Hormone-Dependent Changes in Zinc Metabolism in Man <i>R. I. Henkin</i>	652
Inhibition of Biological Action of Zinc in Man by Other Trace Elements <i>W. J. Pories, E. G. Mansour, F. R. Plecha, A. Flynn, and W. H. Strain</i> ..	656
Ferric Fructose and Treatment of Anemia in Pregnant Women <i>D. J. Eatough, W. A. Mineer, J. J. Christensen, R. M. Izatt, and N. F. Mangelson</i>	659
Absorption and Distribution of the ⁵⁹ Fe from Fe-tartrate by Baby Pigs <i>B. Groppel, M. Anke, G. Dittrich, M. Grün, and A. Hennig</i>	664
Effects of Deficiency in Manganese upon Plasma Levels of Clotting Proteins and Cholesterol in Man <i>E. A. Doisy, Jr.</i>	668
Changes in the Trace-Element Concentration in the Sera and Hair of Kwashiorkor Patients <i>F. J. Burger</i>	671
Abnormal Mineral Metabolism in Patients with a Rare Joint Disease in Zululand, South Africa <i>F. J. Burger and S. A. Fellingham</i>	675
Studies in the Genetically Diabetic Mouse: Effect of Glucose Tolerance Factor (GTF) and Clofibrate (CPIB) on the Diabetic Syndrome <i>R. W. Tuman and R. J. Doisy</i>	678
Trace-Mineral Metabolism in Porphyria and Other Neuropsychiatric Conditions—Role of Chelation Therapy <i>H. A. Peters</i>	682
The Effect of a Two-day Exposure to Dietary Cadmium on the Concentration of Elements in Duodenal Tissue of Japanese Quail <i>R. M. Jacobs, M. R. S. Fox, B. E. Fry, Jr., and B. F. Harland</i>	684

Effects of Long-term Cadmium Exposure in Calcium-deficient Rats <i>M. Piscator and S. E. Larsson</i>	687
Histological and Ultrastructural Observations on the Effects of Cadmium on the Ventral and Dorsolateral Lobes of the Rat Prostate <i>R. Scott, E. Aughey and I. McLaughlin</i>	690
Effect of Toxic Levels of Cadmium and Its Interrelationship to Iron, Zinc, and Ascorbic Acid in Growing Chicks <i>C. W. Weber and B. L. Reid</i>	694
Effect of Different Ions on Fluoride Metabolism in Man <i>H. Spencer</i>	696
The Distribution of Ionic and Bound Fluorine in Plasma and Serum <i>L. Singer and W. D. Armstrong</i>	698
Behavioral, Neurochemical, and Metabolic Correlates of Methylmercury in Mice <i>P. Salvaterra, E. J. Massaro, B. Lown, and J. Morganti</i>	701
Neurological Assessment of Methylmercury Toxicity in Cats <i>R. F. Willes, S. Charbonneau, E. Nera, and I. C. Munro</i>	705
Effect of Low-fluoride Diets Fed to Mice for Six Generations <i>C. W. Weber and B. L. Reid</i>	707
Effect of Different Fluorine Compounds on Growth and Bone Fluoride Levels in Rats <i>D. B. Milne and K. Schwarz</i>	710
Low Nickel Rations for Growth and Reproduction in Pigs <i>M. Anke, M. Grün, G. Dittrich, B. Groppel and A. Hennig</i>	715
Connective-Tissue Disorders and Adrenal Ascorbic Acid During Copper Depletion and Subsequent Repletion in the Growing Rat <i>P. A. Abraham and J. L. Evans</i>	719
Copper and Cardiovascular Changes <i>G. K. Davis, H. R. Camberos, and C. E. Roessler</i>	723
Secondary Copper Deficiency in Ruminants <i>A. Hennig, M. Anke, B. Groppel, and H. Lüdke</i>	726
Effect of Zinc on Thymidine Kinase Activity and DNA Metabolism <i>D. Oberleas and A. S. Prasad</i>	730
Incorporation of [¹⁴ C] Glycine-2 into Skin Collagen in Zinc-deficient Rat <i>J. M. Hsu and W. L. Anthony</i>	733
Parallelism between Sulfur and Selenium Amino Acids in Protein Synthesis in the Skin of Zinc-deficient Rats <i>K. P. McConnell, J. M. Hsu, J. L. Herrman, and W. L. Anthony</i>	736
The Effect of Supplementary Lysozyme on Zinc Deficiency in the Rat <i>R. W. Luecke, B. V. Baltzer, and D. L. Whitenack</i>	739

The Effects of Zinc Deficiency or Excess on the Adrenals and the Thymus in the Rat <i>J. Quarterman</i>	742
Zinc Deficiency during the Critical Period for Brain Growth <i>H. H. Sandstead, Y. Y. Al-Ubaidi, E. Halas, and G. Fosmire</i>	745
Manganese, Zinc, and Genes in Otolith Development <i>L. C. Erway and N. A. Purichia</i>	749
Index	751
