Contents

Preface	xxiii
 Underwood Memorial Lecture	
Selenium Biochemistry and Function J.R. ARTHUR	1
 Trace Element Interactions with Nutrients and Non-Nutrients in Foods and the Food Supply	
Trace Element Interactions in Food Crops R.M. WELCH	6
Food Processing Influencing Iron and Zinc Bioavailability A.-S. SANDBERG	10
Calcium Does Not Inhibit Iron Absorption after Adaptation to a High Calcium Diet in the Infant-Piglet Model INE P.M. WAUBEN, FILOMINA INCITTI, AND STEPHANIE A. ATKINSON	15
Calcium and Zinc Exchange in ⁶⁵ Zn Labelled Rats at Different Levels of Calcium Supply WILHELM WINDISCH AND MANFRED KIRCHGESSNER	17
Effect of Phytate on Endogenous Zinc and Fractionation of Pancreatic/Biliary (P/B) Fluid in Rats DONALD OBERLEAS AND IN-SOOK KWUN	19
Acute and Subchronic Effects of Dietary Cadmium on Iron Absorption in Rats K.J.H. WIENK, M. VAN ZONNEVELD, A.G. LEMMENS, J.J.M. MARX, AND A.C. BEYNEN ..	22
Cadmium Accumulation in Rats and Pigs Influenced by Dietary Phytate and Microbial Phytase G. RIMBACH AND J. PALLAUF	24
Effect of Phytic Acid and Phytase on the Bioavailability of Iron in Rats and Piglets J. PALLAUF AND S. PIPPIG	26
Influence of Citric Acid in Milk on Intestinal Zinc Absorption Inhibited by Phytic Acid M. DE VRESE AND S. DRUSCH	29
Efficacy of a Michaelis-Menton Model for the Availability of Zinc, Iron and Cadmium from an Infant Formula Diet Containing Phytate K.R. WING, A.M. WING, R. SJÖSTRÖM, AND B. LÖNNERDAL	31
High Iron Formulas May Compromise Zinc but not Copper Status in Term Infants in Early Life JANIS A. RANDALL SIMPSON, BOSCO PAES, AND STEPHANIE A. ATKINSON	33
Evaluation of Iron Bioavailability in Infant Weaning Foods Fortified with Heme Concentrate C. MARTINEZ, T.E. FOX, J. EAGLES, AND S.J. FAIRWEATHER-TAIT	35
The Short and Long Term Effects of Calcium Supplements on Iron Nutrition — Is There an Adaptive Response? A.M. MINIHAINE, S.J. FAIRWEATHER-TAIT, AND J. EAGLES	38

Trace Elements and Genetic Regulation: Fe, Zn (Part 1)

The Copper-Transporting ATPases Defective in Menkes Disease and Wilson Disease DIANE W. COX	41
Differential Regulation of Selenoprotein Gene Expression by Selenium Supply G. BERMANO, J.R. ARTHUR, AND J.E. HESKETH	47
The IRT/ZRT Family of Eukaryotic Metal Transporters D.J. EIDE, M. BRODERIUS, T. SPIZZO, AND H. ZHAO	50
Poly(ADP-Ribose) Polymerase: A Model Zn Finger Protein Which is Sensitive to Zn Status J.B. KIRKLAND, C.M. GRAUER, M.M. APSIMON, AND W.J. BETTGER	53
Essentiality of Cellular Zinc Supply for Steroid-Induced Gene Expression G.E. BUNCE, K.D. SIMON, B. STORRIE, AND P.K. BENDER	55
Selenium Regulation of Glutathione Peroxidase mRNA Levels Requires Sequences within the mRNA 3' Untranslated Region in Transfected Chinese Hamster Ovary Cells S.L. WEISS AND R.A. SUNDE	57
Determination of Dietary Selenium Requirement in Female Turkey Poults using Glutathione Peroxidase KEVIN B. HADLEY AND ROGER A. SUNDE	59
Interactions of Mimosine and Zinc Deficiency on the Transit of BHK Cells through the Cell Cycle J.K. CHESTERS AND R. BOYNE	61

Trace Elements in Pregnancy and Lactation

Interaction of Selenium and Iodine Deficiency in the Development of Human Iodine Deficiency Diseases ANTHONY T. DIPLOCK, BERNARD CONTEMPRÉ, JACQUES DUMONT, NGO BEBE, AND JEAN VANDERPAS	63
Ceruloplasmin Expression by Mammary Gland and its Concentration in Milk R.A. SHULZE, L. WOOTEN, P. CERVEZA, S. COTTON, AND M.C. LINDER	69
Serum Elemental Concentrations in the Pregnancy Disease Pre-Eclampsia MARGARET P. RAYMAN, FADI R. ABOU-SHAKRA, CHRISTOPHER W.G. REDMAN, AND NEIL I. WARD	71
Measurements of Blood Lead and Stable Lead Isotopes During Pregnancy in a Non-Human Primate (<i>Macaca fascicularis</i>) M.J. INSKIP, C.A. FRANKLIN, C.L. BACCANALE, C.M.H. EDWARDS, W.I. MANTON, E.J. O'FLAHERTY, AND M. TOCCHI	74
Receptors for Milk Ceruloplasmin in the Brush Border of Piglet Intestinal Mucosa M.C. LINDER AND D. PAREKH	77
Selenite Supplementation to Lactating Mothers Enhances the Selenium Concentration in Milk and the Selenium Intake by Breast-Fed Infants BRONISŁAW A. ZACHARA, URSULA TRAFIKOWSKA, EWA SOBKOWIAK, MACIEJ WIACEK, AND MIECZYŚLAWA CZERWIONKA-SZAFLARSKA	79
Relative Concentrations of Essential and Toxic Metals in Human Milk S. SIVARAM, V.M. SADAGOPA RAMANUJAM, AND N.W. ALCOCK	81

Impact of Social Factors and Heavy Pollution on the Incidence of Anencephaly at the Eastern Coast of Maracaibo Lake, Venezuela L.CH. BARRIOS, O. SALGADO, J.E. TAHAN, L. MARCANO, R.A. ROMERO, H.S. CUBILLAN, J.M. SANCHEZ, M.C. RODRIGUEZ, M. HERNANDEZ, B.I. SEMPRUN, AND V.A. GRANADILLO	84
Effects of Prior Lead Exposure and Diet Calcium on Fetal Development and Blood Pressure During Pregnancy S. HAN, M.L. EGUEZ, M. LING, X. QIAO, F. KEMP, AND J.D. BOGDEN	87
Effect of Zinc and Taurine Status during Prenatal and Postnatal Periods on Oscillatory Potentials in the Mature Rat Retina P.G. PATERSON, K.T. GOTTSCHALL-PASS, B.H. GRAHN, AND D.K.J. GORECKI	89
Intensity-Response Functions of the Electroretinogram in Rats Deficient in Zinc and Taurine throughout Gestation and into Postnatal Life K.T. GOTTSCHALL-PASS, B.H. GRAHN, D.K.J. GORECKI, H.A. SEMPLE, AND P.G. PATERSON	91
The Effects of Lead Levels during Gestation on the Somatometric Parameters of the Neonate M.J. PUENTE, M.J. TAPIA, I. NAVARRO, A. MARTIN, AND I. VILLA	93
Influence of the Intake of Calcium and Iron Supplements During Pregnancy and its Effects on Cadmium and Lead Levels M.J. PUENTE, M.J. TAPIA, I. NAVARRO, A. MARTIN, AND I. VILLA	95
Lead and Cadmium Transference through the Placenta in Gestations M.J. PUENTE, M.J. TAPIA, I. NAVARRO, A. MARTIN, AND I. VILLA	97
The Effect Maternal of Nutritional Copper Deficiency on the Skeletons of Newborn Rats. Radiography Study J. CHAVARRI, I. NAVARRO, AND I. VILLA	99
Copper Levels in Post-Term Newborns J. QUINTERO, I. NAVARRO, A. MARTIN, AND I. VILLA	101

Assessment of Trace Elements Status: Opinions and Prejudices

The Effect of Zinc Deficiency on Erythrocyte Deformability as Measured as a Function of Increasing Shear Stress in the Ektacytometer L.J. ROBINSON, R.T. CARD, AND P.G. PATERSON	103
Erythrocyte Membrane Enzymes as Indicators of Zinc Status T. LARSEN	105
Zinc Metabolism in Insulin Dependent Diabetic Women E.B. FUNG, L.D. RITCHIE, L.R. WOODHOUSE, J.C. KING, AND R. ROEHL	107
The Copper and Zinc Status of Sheep under Different Management Systems in Malaysia MUSTAPHA M. NOORDIN AND ABU B. ZUKI	110
Polymorphonuclear Leukocyte Copper Declines with Low Dietary Copper J.R. TURNLUND, T.M. SAKANASHI, AND C.L. KEEN	113
Urinary Selenium Excretion as Indicator of Selenium Status I. LOMBECK, H. MENZEL, F. MANZ, AND V. MOSTERT	115
Urinary Iodine Excretion in New Zealand Residents C.D. THOMSON, A.J. COLLS, M. STYLES, AND J. CONAGLEN	118

Nutritional Status of Trace Elements in Traditional Populations Inhabiting Tropical Lowland, Papua New Guinea T. HONGO, R. OHTSUKA, M. NAKAZAWA, T. INAOKA, AND T. SUZUKI	120
Lead Concentrations in the Sweat of Lead Workers K. SUZUKI, T. ESASHI, M. NISHIMUTA, H. TOJO, AND Y. KANDA	123
Age and Exposure Variations to Arsenic Excretion JANE L. VALENTINE	126
Lead and Cadmium Contamination of Calcium Supplements Does Not Raise Blood Lead Levels in Dialysis Patients E. BURGESS, R. AUDETTE, R. HONS, K. TAUB, H. MANDIN, AND S. SCHORR	128
Trace Metals In Hemodialysis Patients E. BURGESS, R. AUDETTE, R. HONS, K. TAUB, S. SCHORR, AND H. MANDIN	130
Trace Metals in Peritoneal Dialysis Patients and Hemodialysis Patients E. BURGESS, R. AUDETTE, R. HONS, K. TAUB, S. SCHORR, AND H. MANDIN	132
Do Horses and other Non-Ruminants Require Different Standards of Normality from Ruminants when Assessing Copper Status? N.F. SUTTLE, J.N.W. SMALL, D.G. JONES, AND K.L. WATKINS	134
The Use of Caeruloplasmin Activities and Plasma Copper Concentrations as an Indicator of Copper Status in Ruminants ALEXANDER M. MACKENZIE, DOREEN V. ILLINGWORTH, DAVID W. JACKSON, AND STEWART B. TELFER	137

Kinetic Modelling

Zinc Exchange in ⁶⁵ Zn Labeled Rats at Physiologically Adequate Zinc Supply WILHELM WINDISCH AND MANFRED KIRCHGESSNER	139
Compartmental Model of Zinc Metabolism in Healthy Women N.M. LOWE, D.M. SHAMES, L.R. WOODHOUSE, J.S. MATEL, AND J.C. KING	141
Compartmental Modeling of Human Zinc Metabolism: Evaluation of Method for Estimating the Size of the Rapidly Exchanging Pool of Zinc L.V. MILLER, N.F. KREBS, M. JEFFERSON, D. EASLEY, AND K.M. HAMBIDGE	144
On-Line Access to Published Models of Biological Systems M.E. WASTNEY, N. BROERING, J. BLUMENTHAL, AND R. BOSTON	146

Trace Elements in the Environment and Food Supply

Impact of Prenatal and Early Infant Feeding Practices of Native Indians in the Moose Factory Zone on Lead, Cadmium and Mercury Status R.M. HANNING, R. SANDHU, A. MACMILLAN, L. MOSS, AND E. NIEBOER	148
Role of Goitrogens in the Etiology of Iodine Deficiency Disorders P.P. BOURDOUX	152
Trace Elements in Wheat, Flour and Bread, and their Relations N.K. ARAS, R. ERCAN, W. ZHANG, AND A. CHATT	156
Selenium Intake of Adults in Germany Depending on Sex, Time, Living Area and Type of Diet C. DROBNER, B. RÖHRIG, M. ANKE, AND G. THOMAS	158

Zinc Intake and Zinc Balance of Adults in Central Europe — Depending on Time, Sex, Living Area, Eating Habits, Age and Live Weight M. ANKE, M. MÜLLER, M. GLEI, H. ILLING-GÜNTHER, A. TRÜPSCHUCH, M. SEIFERT, O. SEEBER, AND B. RÖHRIG	160
Trace Element Levels in Australian Cows' Milk C.M. PATTERSON, U. TINGGI, AND C. REILLY	166
Placental and Mammary Transfer of Lead and Cadmium by Ewes Exposed to Pb and Cd-Enriched, Sewage Sludge-Treated Soils N.F. SUTTLE, J. BREBNER, B. STARK, N. SWEET, AND J. HALL	168
Mercury Levels in Muscle of Some Fish Species from the Dique Channel, Colombia J. OLIVERO, V. NAVAS, A. PEREZ, B. SOLANO, R. SALAS, R. VIVAS, AND E. ARGUELLO	171
Mercury in Fish in the Oldman River Reservoir and its Tributaries S. WU, L.Z. FLORENCE, H.V. NGUYEN, K.L. SMILEY, AND K. SCHWALME	173
Effect of a Zinc Bolus on Absorption of ⁷⁰ Zn by Infants E.E. ZIEGLER, R.E. SERFASS, S.E. NELSON, AND J.A. FRANTZ	175
Oral Aluminum Exposure of Adults in Germany — A Long-Term Survey M. MÜLLER, M. ANKE, AND H. ILLING-GÜNTHER	177
Biological Importance, Analysis and Supply of Vanadium H. ILLING-GÜNTHER, M. ANKE, M. MÜLLER, A. TRÜPSCHUCH, AND S. ANKE	179
Magnesium Intake and Magnesium Balance of Adults Eating Mixed or Vegetarian Diets M. GLEI, M. ANKE, AND B. RÖHRIG	181
The Effect of Dietary Magnesium on the Transformation Process in Mice N.A. LITTLEFIELD, W.G. SHELDON, B. LYN-COOK, AND B.S. HASS	183
Rubidium in the Food Chain of Humans: Origins and Intakes M. ANKE, L. ANGELOW, M. GLEI, M. MÜLLER, U. GUNSTHEIMER, B. RÖHRIG, C. ROTHER, AND P. SCHMIDT	186
Rubidium — An Essential Element for Animals and Humans M. ANKE, H. GÜRTLER, L. ANGELOW, J. GOTTSCHALK, C. DROBNER, S. ANKE, H. ILLING-GÜNTHER, M. MÜLLER, W. ARNHOLD, AND U. SCHÄFER	189
Effects of Fluorine-Poor Diets in 10 Generations of Goats M. ANKE, H. GÜRTLER, E. NEUBERT, M. GLEI, S. ANKE, M. JARITZ, H. FREYTAG, AND U. SCHÄFER	192
Distribution of Arsenic in the Tissues of Laying Hens Fed with a Diet Containing As ₂ O ₃ VEKOSLAVA STIBILJ, ANTONIJA HOLCMAN, AND MARJAN DERMELJ	195
Distribution of Toxic and Essential Trace Elements in Soils, Surface Waters, Crops, and Agrochemicals in the Palliser Triangle, Southwestern Saskatchewan L. SONG AND R. KERRICH	197
Effect of Dietary Zinc on Absorption and Tissue Accumulation of Cadmium in Romney Sheep J. LEE, J.R. ROUNCE, N.D. GRACE, AND D.C. GREGOIRE	199
Enhancing the Consumers' Perception of Wheat and Wheat Products, Especially with Regard to Essential Trace Minerals C.M. PATTERSON AND E. MORRISON	201
Loss of Canadian Wheat Imports Lowers Selenium Intake and Status of the Scottish Population A. MACPHERSON, M.N.I. BARCLAY, R. SCOTT, AND R.W.S. YATES	203
Absolute Bioavailability of Lead from Soil K. GROEN, R. NIJDAM, AND A.J.A.M. SIPS	206

Trace Elements, Brain Function, and Behaviour

Persistent Neurochemical and Behavioral Abnormalities in Adult Rats Following Recovery from Perinatal Copper Deficiency J.R. PROHASKA	208
Trace Elements, Brain Function and Behavior: Effects of Zinc and Boron J.G. PENLAND	213
Effect of Iron Deficiency Anemia on Cognitive Skills and Neuromaturation in Infancy and Childhood TOMAS WALTER, PATRICIO PEIRANO, AND MANUEL RONCAGLIOLO	217
Impaired Startle Response in Growing Rats Marginally Iron-Depleted without Overt Anemia J.R. HUNT AND J.G. PENLAND	220
Metabolic Analysis of Vanadate and Effect on Neurochemical Behavior as a Result of Chronic Oral Administration of Vanadate MIEKO KAWAMURA, TATSUO IDO, REN IWATA, YUKIKO NAKANISHI, AND SHUICHI KIMURA	222

Trace Elements, Membrane Function and Cell Signalling

Role of Zinc in Maintaining Endothelial Integrity BERNHARD HENNIG, PATRICE CONNELL, MICHAL TOBOREK, SHIRISH BARVE, AND CRAIG J. MCCLAIN	224
Vanadium as a Modulator of Cellular Regulation — The Role of Redox Reactivity ALLAN DAVISON, LINDA KOWALSKI, XUEFENG YIN, AND SIU-SING TSANG	229
Manganese Stimulates the Oxidative Burst of HL-60 Cells Through Protein Phosphorylation K.R. SMITH AND S.S. PERCIVAL	234
Iron Inhibits Copper Uptake by Rat Hepatocytes by Down-Regulating the Plasma Membrane NADH Oxidase P. WHITAKER AND H.J. MCARDLE	237
GSH Levels Decrease During Fe Uptake by U937 Cells XAVIER ALVAREZ-HERNANDEZ, MARIA EUGENIA GOMEZ, PAULA HUNT, KRISHNASWAMY KANNAN, AND JONATHAN GLASS	240
Copper Deficiency Increases Microvascular Dilation to Endotoxin DALE A. SCHUSCHKE, JACK T. SAARI, AND FREDERICK N. MILLER	242
Influence of Alimentary Zinc Deficiency on the Concentration of the Second Messenger D-myo-inositol-1,4,5-trisphosphate (IP ₃) in Testes, Brain and Blood Cells of Force-Fed Rats H.-P. ROTH AND M. KIRCHGESSNER	244

Analytical, Experimental and Isotopic Trace Element Techniques

Multi-Element and Isotope Ratio Determinations in Foods and Clinical Samples using Inductively Coupled Plasma-Mass Spectrometry H.M. CREWS, M.J. BAXTER, D.J. LEWIS, W. HAVERMEISTER, S.J. FAIRWEATHER-TAIT, L.J. HARVEY, AND G. MAJSK-NEWMAN	247
Metal/Metalloid Speciation Analysis of Human Body Fluids by using Hydride Generation ICP-MS Methodology J. FELDMANN, E.B. WICKENHEISER, AND W.R. CULLEN	252
High Performance ICP-MS For Elemental Compositions, Isotope Ratios, and Speciation C.B. DOUTHITT	255

Microwave Digestion of Food and Plant Reference Materials for Trace Multi-Element Analysis by ICP-MS with an Ultrasonic Nebulizer/Membrane Desolvator S. WU, X. FENG, A. WITTMEIER, AND J. XU	257
Intratumoral Carboplatin Kinetics in Patients with Malignant Melanoma: Application of Microdialysis Sampling V. MEISINGER, B. BLÖCHL-DAUM, M. MÜLLER, J. JÄGER, A. FASSOLT, H.G. EICHLER, AND H. PERHAMBERGER	260
Distribution of Trace Elements in Bean Sprouts Determined by PIXE Analysis MASAE YUKAWA, AYAMI KIMURA, YOSHITO WATANABE, AND SHIRO SAKURAI	265
Stable Tracers for Tracer Kinetic Investigations of Molybdenum: Intrinsic and Extrinsic Tagging M.C. CANTONE, D. DE BARTOLO, A. GIUSSANI, CH. HANSEN, P. ROTH, P. SCHRAMMEL, I. WENDLER, E. WERNER, AND F. NÜSSLIN	267
Can Rare Earth Elements be Used as Non-Absorbable Fecal Markers in Studies of Iron Absorption? S.J. FAIRWEATHER-TAIT, A.M. MINIHANE, J. EAGLES, L. OWEN, AND H.M. CREWS	270

Ethics of Trace Element Research in Human and Animal Nutrition

Ethical Use of Animals for Experimentation and Teaching P.R. FLANAGAN	273
Ethical Considerations Involved in Trace Element Research with Humans PHYLLIS E. JOHNSON	276

Defining Trace Element Requirements of Preterm Infants

Adequate Zinc Status to Six Months Corrected Age in Premature Infants Fed Mother's Milk Pre- and Post-Hospital Discharge INE P.M. WAUBEN, BOSCO PAES, JAY K. SHAH, AND STEPHANIE A. ATKINSON	279
Selenium Levels in Preterm Infant Formulae and Breast Milk from the United Kingdom: A Study of Estimated Intakes S. SUMAR, B. KONDZA, AND L.H. FOSTER	282

Trace Element Intervention Studies: Design and Interpretation

Increases in Hemoglobin and Ferritin Resulting from Consumption of Food Containing Ferrous Amino Acid Chelate (Ferrochel) versus Ferrous Sulfate H. DEWAYNE ASHMEAD, SANDRA F.M. GUALANDRO, AND JOSE JOAO NAME	284
Monitoring of Al, Cr, Pb, Cu and Zn in Water and in Dialysis Fluid in Haemodialysis Centres in Slovenia M. BENEDIK AND R. MILAČIĆ	286
Possible Adsorption-Desorption Processes of Al, Zn and Cu on Plastic Tubing in Haemodialysis Monitors RADMILA MILAČIĆ, MIHA BENEDIK, AND SVETLANA KNEŽVIĆ	288

Trace Elements and Animal Production

Trace Elements and Animal Production GARY L. CROMWELL	290
Impact of Trace Element Nutrition of Animals on the Food Chain J.T. YEN	294

Effect of High Sulphur Intake as Elemental and Thiosulphate Sulphur on the Copper Status of Grazing Lambs N.D. GRACE, J.R. ROUNCE, AND J. LEE	298
A Comparison of Methods of Assessing Copper Status in Cattle ALEXANDER M. MACKENZIE, DOREEN V. ILLINGWORTH, DAVID W. JACKSON, AND STEWART B. TELFER	301
The Use of a Soluble Glass Bolus to Prevent Zinc Deficiency in Sheep N.R. KENDALL, A.M. MACKENZIE, AND S.B. TELFER	303
<i>In Sacco</i> Disappearance in the Rumen of Selenium in Feedstuffs J.B.J. VAN RYSSEN, B.J. VAN DER MERWE, AND G.E. SCHROEDER	306
Bioavailability of Supplemental Sources of Manganese and Copper for Chicks and Lambs Estimated from High Dietary Additions CLARENCE B. AMMERMAN, PAMELA R. HENRY, AND RICHARD D. MILES	308
Indicators of Vitamin B ₁₂ Status of Cattle G.J. JUDSON, J.D. MCFARLANE, K.L. BAUMGURTEL, A. MITSIOULIS, R.E. NICOLSON, AND P. ZVIEDRANS	310
A New Intraruminal Controlled-Release-Capsule Providing Monensin and Selenium for Cattle N.D. COSTA, A. PURWANTORO, E.G. TAYLOR, AND L.B. LOWE	312
Study on the Herbicidal Effect of Selenium on the Dock, <i>Rumex obtusifolius</i> S.K. WOMAK	315
Diurnal Pattern of Exocrine Pancreatic Secretion of Zinc and Carboxypeptidase B in Growing Pigs M.S. JENSEN, T. LARSEN, AND V.M. GABERT	317
Mineral Contribution of Pancreatic Secretion in Growing Pigs Fed Two Dietary Protein Levels EDUARDO R. CHAVEZ, SHAOYAN LI, AND WILLEM C. SAUER	319
Macro and Trace Mineral Utilization in a Low-Phosphorus Diet Fed at Three Levels of Calcium to Broiler Chickens with or without Phytase EDUARDO R. CHAVEZ, SYLVESTER SEBASTIAN, AND SHERMAN P. TOUCHBURN	321
Trace Element Homeostasis in the Avian Embryo MARK P. RICHARDS	323
Influence of Corrected Teeth on Digestibility of Macro-, and Microminerals in Pregnant Mares D. GATTA, L. KRUSIC, P. SCHRAMMEL, S. PINOLA, AND B. COLOMBANI	326

Trace Elements and Free Radical Mediated Disease

The Role of Iron in Free Radical Reactions S.D. AUST AND J.-H. GUO	329
The Role of Zinc (Zn) in Free Radical Mediated Diseases T.M. BRAY, M.A. LEVY, M.D. NOSEWORTHY, AND K. ILES	333
Transgenic Mice Overexpressing Catalase Specifically in the Heart for Studying Cardiac Oxidative Injury Induced by Copper Deficiency Y.J. KANG, Y. CHEN, AND J.T. SAARI	337
Plasma Bleomycin Detectable Iron (PBDFe) and Malondialdehyde (MDA) Concentrations in Children with Kwashiorkor, Marasmus and Acute Infective Illness A.A. SIVE, W.S. DEMPSTER, H. MALAN, AND H. DEV. HEESE	340
Copper Proteins and Coronary Heart Disease J.C. FREEBURN, J.M.W. WALLACE, D. SINNAMON, B. CRAIG, W.S. GILMORE, AND J.J. STRAIN	343

Plasma Thiol and Carbonyl Content Are Not Affected by Dietary Copper Deficiency in Rat K.A. COCKELL AND B. BELONJE	345
Distribution and Pathological Studies on Rare-Earth Elements in Non-Insulin Dependent Diabetes Mellitus Mice SHUICHI ENOMOTO, BIN LIU, RAJIV G. WEGINWAR, RYOHEI AMANO, SHIZUKO AMBE, AND FUMITOSHI AMBE	347
Vanadium and Susceptibility to Peroxidative Change in STZ-diabetic Rats K.H. THOMPSON AND J.H. MCNEILL	349
Reduced Plasma Total Antioxidant Status in Major Trauma Patients Following Trace Element Supplementation M. BAINES, C.A. WARDLE, M.M. BERGER, A. PANNATIER, R. CHIOLERO, AND A. SHENKIN	351
The Feasibility of Using Exfoliated Human Colon Cells to Monitor the Potential Pro-Oxidant Effects of Iron S.G. WHARF, E.K. LUND, M. PARKER, I.T. JOHNSON, AND S.J. FAIRWEATHER-TAIT	353
Oral Intake of Orange Peel Prevented Cadmium-Induced Renal Dysfunction K. NOMIYAMA, H. NOMIYAMA, N. KAMEDA, H. SAKURAI, AND H. TAKAHASHI	356
Oedema, Plasma Bleomycin Detected Iron, Transferrin, Transferrin Saturation, and Malondialdehyde in Patients with Kwashiorkor HANS DEV. HEESE, WILLIAM S. DEMPSTER, HESTER MALAN, AND ALAN A. SIVE	359
Effect of a Maximal Effort on Blood Trace Elements and Magnesium and on some Oxidative Stress Parameters C.P. MONTEIRO, D. PEREIRA, H. RIBEIRO, C. RABAÇAL, G.M. FELISBERTO, C. MENDONÇA, L. NUNO, M. DIAS, E. CARVALHO, C. VAZ, J.S. AFONSO, J.S. FERNANDES, Z. SILVA, M. BICHO, A. MAZUR, Y. RAYSSIGUIER, AND M.J. LAIRES	361
Multitracer Study on the Uptake of Inorganic Ions by Tumor SHUICHI ENOMOTO, BIN LIU, RAJIV G. WEGINWAR, SHIZUKO AMBE, AND FUMITOSHI AMBE	363
Copper and Iron Thiobarbiturate Interfere with the Determination of Malondialdehyde M. ZHOU AND J.R.J. SORENSON	365

Trace Elements and Genetic Regulation (Part II)

Metallothioneins 1–4 JOHN H. BEATTIE AND IAN BREMNER	367
Metals as Regulators of the Biological and Physiological Roles of Heme Oxygenase N.G. ABRAHAM AND A. KAPPAS	372
Expression of Metallothionein in the Liver of Rats Fed Copper-Deficient AIN-93G Diet Y.J. KANG, Y. CHEN, AND J.T. SAARI	377
The Dynamics of Metallothionein Gene Expression and Regulation in Liver and Kidney of Rats M. HELENA VASCONCELOS, SHUK-CHING TAM, JOHN E. HESKETH, AND JOHN H. BEATTIE	380
Structure and Cloning of Serum Ferritin M.C. LINDER, M. HAZEGH-AZAM, C.Y.J. ZHOU, K.J. SCHAFFER, C.A. GOODE, AND G.M. NAGEL	384
Expression and Regulation of the Secretion of Serum Ferritin K.J. SCHAFFER, T.N. TRAN, M. HAZEGH-AZAM, AND M.C. LINDER	386

Trace Elements, Food and Nutrition Policy

Considerations Regarding Future Trace Element Dietary Reference Intakes J.C. KING	388
Iron Fortification in the UK: How Necessary and Effective Is It? S.J. FAIRWEATHER-TAIT	392
Universal Salt Iodization: Myth or Reality? P.P. BOURDOUX, H.V. VAN THI, S. VAN STICHELEN, AND A.M. ERMANS	397
Essentiality vs. Toxicity of Essential Trace Elements: A Nutritional Toxicologist Looks at the Upper Safe Level JAMES R. COUGHLIN	399
The AIN-93G Diet: Nephrocalcinosis, Kidney Calcium and Tissue Trace Element Levels MARY R. L'ABBÉ, KEITH D. TRICK, AND BARTHOLOMEUS BELONJE	401
Dose-Rate Idiorrhythm is a Powerful Tool for the Detection of Subtle Mineral Interactions. A Case for the Expression of Recommended Dietary Allowances (RDAs) and Safety Limits (RFDs) in the Range Format B. MOMČILOVIĆ	403

Analytical Quality Control

Knowledge Gaps in Analytical Quality Control ROBERT DABEKA	406
Unique Quality Assurance Aspects of Neutron Activation Analysis ROBERT R. GREENBERG	410
Comparison of Two Mineralization Procedures for Determination of Total Mercury in Biological and Clinical Materials by Cold Vapor Atomic Absorption Spectrometry M.C. RODRIGUEZ, J.M. SANCHEZ, H.S. CUBILLAN, M. HERNANDEZ, B.I. SEMPRUN, L.CH. BARRIOS, R.A. ROMERO, AND V.A. GRANADILLO	414
Determination of Ca, Fe, Mg, K and Na in Cereals by Flame Atomic Absorption Spectrometry M. HERNANDEZ, B.I. SEMPRUN, J.M. SANCHEZ, H.S. CUBILLAN, L.CH. BARRIOS, M.C. RODRIGUEZ, R.A. ROMERO, AND V.A. GRANADILLO	416
Does the Cultivation System Affect the Cadmium Levels in Crops? L. JORHEM	418

Trace Elements, Infection and Immune Function: Research Developments at Diverse Levels of Biological Organization

What Role Does Iron Play in the Immune Response? A.R. SHERMAN AND D. HRABINSKI	420
Copper and Immunocompetence M.L. FAILLA AND R.G. HOPKINS	425
Reduced Hydrolysis of Cell Membrane Phospholipids in Murine Splenic Lymphocytes in Iron Deficiency: Implication on Impaired Blastogenesis S. KUVIBIDILA, S.B. BALIGA, R.P. WARRIER, AND R.M. SUSKIND	429
Candidastatic Activity of Human Plasma: Its Relation to Zinc and Iron Availability B.E. GOLDEN AND P.A. CLOHESSY	431
Large Trace Element Supplements Reduce the Number of Infectious Episodes after Burns M.M. BERGER, A. SHENKIN, F. SPERTINI, C.A. WARDLE, A. CLOUGH, C. SCHINDLER, L. WIESNER, C. CAVADINI, C. CAYEUX, AND R. CHIOLERO	433

Neutropenia in a Perinatal Copper Deficient Mouse Model S.S. PERCIVAL AND B. LANGKAMP-HENKEN	436
Effects of Marginal Copper Deficiency on the Outcome of a <i>Nippostrongylus brasiliensis</i> Infection in Rats N. SANGWAN, N.F. SUTTLE, D.P. KNOX, AND K. MCLEAN	438
Role of Zinc in Systemic and Local Immunity E. MOCCHEGIANI, L. SANTARELLI, AND N. FABRIS	440
Effect of a Soluble Cobalt, Selenium and Zinc Glass Bolus on Humoral Immune Response and Trace Element Status in Lambs N.R. KENDALL, A.M. MACKENZIE, AND S.B. TELFER	442
Lead Poisoning and Renal Function: Relationship with Trace Elements and Immune Response N. RESTEK-SAMARZIJA, B. MOMČILOVIĆ, AND M. BLANUŠA	445

Trace Element Intervention Strategies in Animal and Human Nutrition

A Strategy for Breeding Staple-Food Crops with High Micronutrient Density ROBIN D. GRAHAM AND ROSS M. WELCH	447
Dietary Strategies to Help Combat Trace Mineral Deficiencies in Weanlings from Sub-Saharan Africa R.S. GIBSON, J. KÖPF, J. LEHRFELD, W.J. BETTGER, AND E.L. FERGUSON	451
Trace Element and Dietary Fiber Intake in Hungary ANNA GERGELY AND MARIANN KONTRASZTI	455
Selenium Supplementation in Sub-Fertile Human Males R. SCOTT, A. MACPHERSON, AND R. YATES	458
Bioavailability of an Iron Glycine Chelate for use as a Food Fortificant Compared with Ferrous Sulphate T.E. FOX, J. EAGLES, AND S.J. FAIRWEATHER-TAIT	460
Ammonium Tetrathiomolybdate (TTM) and Metal Distribution in Copper Supplemented Sheep S. HAYWOOD AND Z. DINCER	463
Effects of Selenium on Chemically-Induced Gallbladder Carcinogenesis in Hamsters H. NAKADAIRA, T. ISHIZU, AND M. YAMAMOTO	466
The Effect of Level and Form of Supplementary Selenium on Tissue Concentrations in Lambs and their Importance in Raising Human Dietary Selenium Intake J. MOLNÁR, S. DRUSCH, AND A. MACPHERSON	468

Trace Element Binding Proteins: Their Regulation and What They Regulate

The Soluble Form of the Transferrin Receptor and Iron Status ROY D. BAYNES	471
Involvement of Lactoferrin and Lactoferrin Receptors in Iron Absorption in Infants B. LÖNNERDAL	476
Metallothionein (MT) Enhancement in Brains of Ammonium Tetrathiomolybdate (TTM) Treated Copper Supplemented Sheep Z. DINCER AND S. HAYWOOD	481
Investigations in a Child with Hyperzincaemia: Partial Characterisation of an Abnormal Zinc Binding Protein, Kinetics and Studies of Liver Pathology B. SAMPSON, I.Z. KOVAR, J.H. BEATTIE, H.J. MCARDLE, A. RAUSCHER, S. FAIRWEATHER-TAIT, AND B. JASANI	484

Metallothionein mRNA Induction Associated with Nitric Oxide Related Pathway K. ARIZONO, Y. MIMAMI, H. HAMADA, AND T. ARIYOSHI	487
Accumulation of Mercury and Selenium in Human Thyroid I. FALNOGA, I. KREGAR, P. STEGNAR, AND M. TUŠEK-ZNIDARIĆ	489
Ferritins of Different Sizes and Structures in Horse Heart and Serum L. BUTCHER, J.R. WANG, C. AMBROSI, AND M.C. LINDER	491

Role of Trace Elements in Growth and Development

Zinc Homeostasis in Infants N.F. KREBS	493
Zinc-Iron Interaction in the Premature Infant J.K. FRIEL, P.V. FENNESSEY, L.V. MILLER, W.L. ANDREWS, B.S. SIMMONS, AND R.E. SERFASS	497
Zinc Needs of Premature Infants to One Year of Age STEPHANIE A. ATKINSON, INE P.M. WAUBEN, AND BOSCO PAES	501
Effects of Zinc (Zn) and Micronutrient (M) Repletion on Chinese Children H.H. SANDSTEAD, N.W. ALCOCK, H.H. DAYAL, J.G. PENLAND, X.C. CHEN, J.S. LI, F.J. ZHAO, AND J.J. YANG	506
Endogenous Iron Losses in 6–12 Month Old Infants J.L. BELSTEN, C.E. PHILLIPS, S.J. FAIRWEATHER-TAIT, J. EAGLES, AND P.J. AGGETT . .	509
Influence of Alimentary Zinc Deficiency on the Somatotropic Axis of Rats H.-P. ROTH AND M. KIRCHGESSNER	512
Effects of Copper Deficiency on the Tibia of the Neonatal Rat. Morphologic and Histologic Survey J. CHAVARRI, I. NAVARRO, AND I. VILLA	515

Trace Elements in Bone Metabolism

More Precious than Gold: Trace Elements in Osteoporosis P. SALTMAN	517
The Role of Aluminum in the Bone Disease of Parenterally Fed Patients G.L. KLEIN	521
Serum Fluoride and Bone Metabolism in Patients with Long Term Hemodialysis K. KONO, Y. ORITA, T. DOTE, Y. TAKAHASHI, K. USUDA, Y. SUMI, M. SAITO, M. SHIMAHARA, AND N. HASHIGUCHI	524
Effect of Cadmium Exposure and Diet with Lower Calcium on Bone in Female Rats M. PIASEK, N. SCHÖNWALD, M. BLANUŠA, K. KOSTIAL, AND B. MOMČILOVIĆ	527
Relationships Between Indicators of Mineral Status and Bone Mineral Hormones in Adults Supplemented with Zinc, Copper or Chromium A.B. ARQUITT, J.R. HERMANN, AND B. ADELEYE	529
Osteopenia Induced by Long-Term, Low and High-Level Exposure of the Adult Rat to Lead H.E. GRUBER, F. KHALIL-MANESH, T.V. SANCHEZ, M.H. MEYER, AND H.C. GONICK . .	532

Mechanisms of Trace Element Toxicity

Epigenetic Mechanisms of Nickel Carcinogenesis MAX COSTA	534
---	-----

Studies of the Embryotoxicity and Teratogenicity of Metals in <i>Xenopus Laevis</i> F.W. SUNDERMAN, JR.	538
Investigation of the Relationship Between Hypermanganesaemia and Liver Disease C.A. WARDLE, A. CLOUGH, N.B. ROBERTS, A. JAWAHARI, A. FORBES, AND A. SHENKIN	542
Bile is an Important Route of Elimination of Ingested Aluminum by Unanesthetized Rats J.L. GREGER AND J.E. SUTHERLAND	544
Ultrastructural Changes in the Duodenum of Copper-Loaded Rats I. CARMEN FUENTEALBA AND DOROTA WADOWSKA	546
Thiomolybdate and Zinc Therapy in Copper Overload Syndromes J. MCC. HOWELL	549
The Function of Thiols in the Toxicity of Selenite and Nuclear Cataract G.E. BUNCE, J.L. HESS, K.D. DELL, AND K. SMITH	551
Toxicity of Inorganic and Organic Selenium to Chickens M.B. MIHAILOVIĆ, M. TODOROVIĆ, M. JOVANOVIĆ, T. PALIĆ, I.B. JOVANOVIĆ, O.J. PEŠUT, AND M. KOSANOVIĆ	554
Influence of New Carbodithioates on the Tissue Cadmium and Trace Elements Level in Mice — Interaction with Selenium V. EYBL, D. KOTYZOVÁ, J. KOUTENSKÝ, V. MÍČKOVÁ, M.M. JONES, AND P.K. SINGH	556
Effect of Simultaneous Pretreatment with Selenium and Cadmium on Testicular Injury by a Subsequent Challenge Dose of Cadmium in Mice MICHIMIRO KATAKURA, NAOKI SUGAWARA, AND HIROTSUGU MIYAKE	558
Effect of Lead, Magnesium and Selenium on the Lysosomes of the Carp (<i>Cyprinus carpio</i> L.) N. KRALJ-KLOBUČAR AND A. STUNJA	560
Plasma and Cellular Lead in Hypertension K. KISTERS, W. ZIDEK, AND C. SPIEKER	562
Methylmercury Toxicity and Transport in a Human Intestinal Cell Line in Culture (Caco-2) M.L. SCARINO, C. DI NITTO, M. DI FELICE, AND G. ROTILIO	564
Changes in the Blood and Dialysate Concentration of Trace Metals During the Management of Desferrioxamine B Therapy in Peritoneal Dialysis J.M. SANCHEZ, H.S. CUBILLAN, B.I. SEMPRUN, M. HERNADEZ, L.CH. BARRIOS, M.C. RODRIGUEZ, L.E. ELEJALDE, J.E. TAHAN, AND V.A. GRANADILLO	566
Biodistribution of Au(III) Ion and its Complexes in Mice SHUICHI ENOMOTO, RAJIV G. WEGINWAR, BIN LIU, SHIZUKO AMBE, AND FUMITOSHI AMBE	568
Does TTM-Treatment Alleviate Hepatitis Occurring Naturally in Long-Evans Cinnamon (LEC) Rats Fed a Copper Normal Diet? NAOKI SUGAWARA, YU-RONG LAI AND CHIEKO SUGAWARA	570
Protective Role of Metallothionein in Cisplatin-Caused Renal Toxicity M. SATOH, Y. AOKI, AND C. TOHYAMA	572

Newer Trace Element Interactions in Animal and Human Nutrition

Selenium and Iodine Deficiencies and the Control of Selenoprotein Expression J.R. ARTHUR, F. NICOL, J.H. MITCHELL, AND G.J. BECKETT	574
Biological Interactions of Iron and Copper. New Revelations EDWARD D. HARRIS	579

Interactive Effects of Iodine and Vitamin A Supplementations on Measures of Thyroid and Retinol Metabolism in Rural Tanzanian Children NIGEL C. ROLLINS, J.J. STRAIN, JENNY CRESSWELL, K. MTEBE, AND N. BANGU	584
Zinc–Selenium–Iodine Interactions in Rats M. RUZ, J. CODOCEO, J. GALGANI, L. MUÑOZ, N. GRAS, S. MUZZO, AND C. BOSCO	587
Effects of Aspirin, Chromium and Iron Interactions on Insulin, Cholesterol and Tissue Minerals in Mice B.J. STOECKER, M.L. DAVIS-WHITENACK, AND B.O. ADELEYE	589
Analysis of Serum Boron Distribution among Inhabitants of an Urban Area in Japan K. USUDA, K. KONO, M. WATANABE, K. NISHIURA, K. IGUCHI, H. NAGAIE, T. TAGAWA, E. GOTO, M. SHIMAHARA, AND J. SENDA	592
Varying Concentrations of Dietary Iodine and Selenium Interact in Thyroid Hormone Metabolism C.S. HOTZ, M.R. L'ABBÉ, D.W. FITZPATRICK, AND K.D. TRICK	595
Interactions Between Vitamin A Deficiency and Iron Metabolism: Clues as to Underlying Mechanisms A.J.C. ROODENBURG, C.E. WEST, AND A.C. BEYNEN	597
Dietary Boron and Vitamin D Affect Hepatic Glycolytic Metabolite Concentrations in the Chick C.D. HUNT	599
Iodine and Selenium in Budgerigar (<i>Melopsittacus undulatus</i>) Juvenile Plumage during Moulting Accelerated by L-Thyroxine Z. GOLOB, V. STIBILJ, M. DERMELJ, AND S.V. BAVDEK	602

Metabolic and Physiological Consequences of Marginal Trace Element Deficiencies

Disruption of the Metabolism of Polyunsaturates during Moderate Zinc Deficiency S.C. CUNNANE AND J. YANG	604
The Effect of Zinc Depletion on the Concentration of Circulating Hormones and Transport Proteins B. SUTHERLAND, N.M. LOWE, B.J. BURRI, AND J.C. KING	609
Copper and Zinc Levels in Patients with Coronary Heart Disease (CHD) G.W. MIELCARZ, N.R. WILLIAMS, J. RAJPUT-WILLIAMS, S.V. NIGDIKAR, A.N. HOWARD, P.G. MULLINS, AND D.L. STONE	612
Iron Can be Cholesterotropic and Cuprotropic LESLIE M. KLEVAY	614
Contrasting Responses of Hearts from Rats Fed Diets Deficient or Marginal in Copper DENIS M. MEDEIROS, THUNDER JALILI, AND LAURA SHIRY	616
Adult Responses to Various Short-Term Dietary Copper Intakes: Insights on Human Requirements and Indicators of Status D.B. MILNE	619
Effects of Selenium Repletion and Depletion on Selenium Status and Thyroid Hormone Metabolism in Rats with Mild Iodine Deficiency MUQING YI AND YIMING XIA	621
Copper Deficiency Causes <i>in vivo</i> Oxidative Modification of Erythrocyte Membrane Proteins in Rats W.T. JOHNSON, T.P. LABERGE, AND K.A. SUKALSKI	624

Absence of Hypertension in Adult Copper-Deficient Rats Despite Vascular Alteration: Potential Renal Compensation JACK T. SAARI	626
Copper and Zinc Levels in Patients with Chronic Pancreatitis K. LINKE AND G.W. MIELCARZ	628
Effect of Low Copper Diet on Opioid Peptides in Young Men S.J. BHATHENA, M.J. WERMAN, AND J.R. TURNLUND	630
The Use of Stable Isotopes to Determine Adaptive Responses to Different Dietary Intakes of Copper L.J. HARVEY, G. MAJSAK-NEWMAN, S.J. FAIRWEATHER-TAIT, J. EAGLES, D.J. LEWIS, AND H. CREWS	632
The Effects of Zinc Status on the Osmotic Fragility of Human Erythrocytes L.R. WOODHOUSE, L.J. LEDERER, N.M. LOWE, AND J.C. KING	636
The Effect of Zinc Deficiency on Desaturation of Fatty Acids KLAUS EDER AND MANFRED KIRCHGESSNER	639
The Effect of Zinc Deficiency on Regulation of Hepatic Lipogenic Enzymes by Dietary Polyunsaturated Fatty Acids in Rats KLAUS EDER AND MANFRED KIRCHGESSNER	641
Effect of Moderate Zinc Deficiency on Vitamin B ₆ Metabolism in Rats FLORIAN L. CERKLEWSKI AND JAMES E. LEKLEM	643
Effect of Nickel Deficiency on the Activities of Enzymes from Energy Metabolism GABRIELE I. STANGL AND MANFRED KIRCHGESSNER	645
Nickel Deficiency Alters Liver Lipid Metabolism in Rats GABRIELE I. STANGL AND MANFRED KIRCHGESSNER	647

Trace Element Research in the Year 2000

Differential mRNA Display, Competitive Polymerase Chain Reaction and Transgenic Approaches to Investigate Zinc Responsive Genes in Animals and Man ROBERT J. COUSINS	649
Beyond Copper, Iodine, Selenium and Zinc: Other Elements That Will be Found Important in Human Nutrition by the Year 2000 F.H. NIELSEN	653
